

ENIGMA 2000 NEWSLETTER

<http://enigma2000group.org>

This commemorative brass plaque can be seen in the entrance to the National Radio Centre [sponsored by RSGB] at Bletchley Park to remember the work done by 1500 Radio Amateurs in WW2 who intercepted coded messages sent by the Abwher.

Notable that without wireless intercepts Bletchley Park would have had little to do

ISSUE 126
September 2021

<http://www.enigma2000.org.uk>

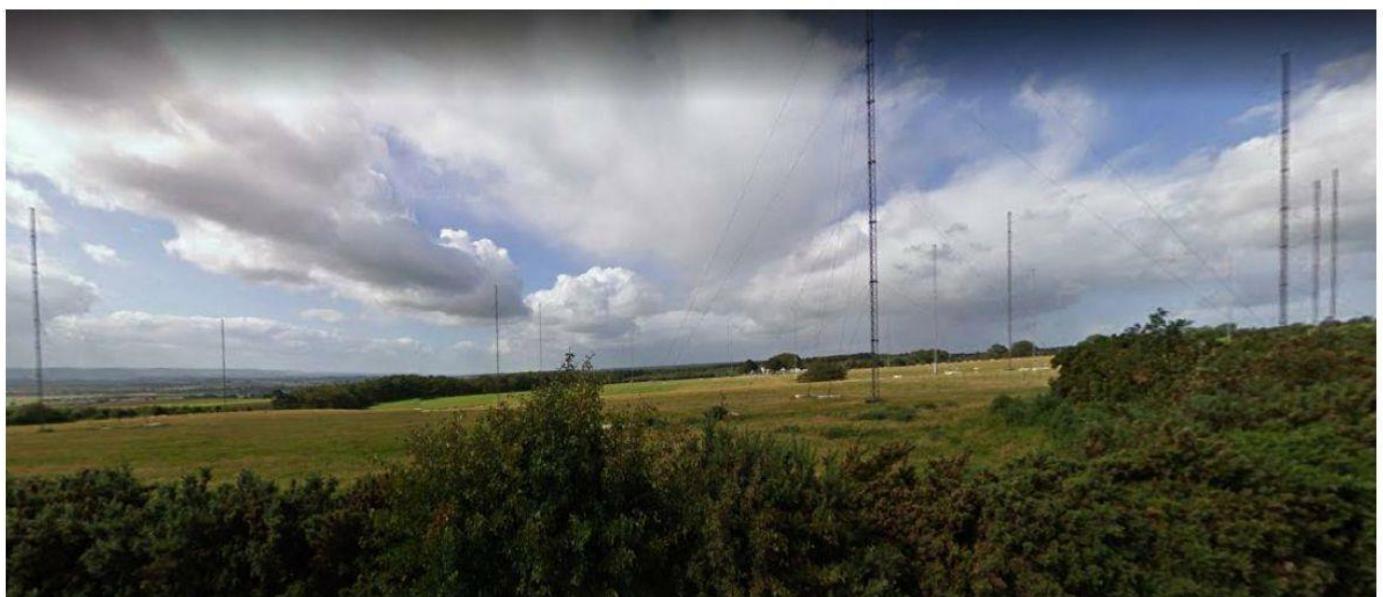

Editorial

Once again the expected change in propagation has yet to appear; the number stations continue unbounded with a few changes of frequency. E07a Wednesday 2000z and Thursday 0430z schedules being expected. Signal strengths here remained very strong with some exception.

Noise of course remains a problem and it seems OFCOM has dumped any willingness to police the SW spectrum as other stuff goes much higher into GHz and also via satellite and via the internet and short radio links where necessary; read more further on.

One member visited Scarborough and sent your editor a postcard to remind him of a certain hotel that might have been good in its Victorian heyday but not now.

He remarked about seeing certain antennas as he entered Scarborough, so here they are in all their glory:

Antennas seen at CSOS Irton Moor, better known as GCHQ Scarborough

More on Scarborough antennas next Issue

We have been joined by new member Xaver; he writes:

Dear readers of the ENL,

What? There is a new member? - Yes, I'm Xaver and I recently became a member of the ENIGMA2000 group. In the following I want to introduce myself briefly.

I'm 19 years old and come from Puchheim in Upper Bavaria. I've been listening to numbersstations since nearly seven years now. Most of the time I was just a quiet reader of ENL at the beginning. Now I wanted to change that and that's why I joined the E2k. The impetus for this gave me Jochen, who is generally known as "Kopf". At this point, thanks for him for his great idea.

Now we come to my favourite subjects. Generally I mostly deal with spoken broadcasts, such as E07 and E11. But sometimes I also listen to Morse code stations such as M01 and M12. A PL-880 world receiver by TECSUN is used as receiving equipment. I always use the telescopic antenna for reception. Geographically, I am very well located at my reception location in JN58OA. There is no QRM in my house at all due to interference. So it is also possible to receive S28 all day long with sufficient sound quality.

All in all, I am very happy to be able to work on the E2k project. I believe that I'll bring a little breath of fresh air into E2k. I am definitely looking forward to further cooperation.

Many greetings and 73
Xaver Hellmeier (XAH)

Welcome indeed Xaver; hope you enjoy your stay with us, of course. Thanks for this intro.

PoSW shared his logs again for this newsletter. Like me he has noted this increase in noise levels. For myself with my house in total disarray with a major refurbishment going on I have noted a slight decrease in noise but the TV and Radio are not plugged in so that might be a source as anticipated so ferrite slugs on the mains cables before reconnection sometime in the future. Peter writes '.... an increase in local RF noise interference which was first noticed in early July; I probably mentioned some time ago that I had suffered intense interference from the HF end of the medium wave broadcast band up to about 3 MHz which had been on for several years but then suddenly vanished. Something similar has appeared again, not quite so strong but enough to wipe out all but the strongest signals between about 1400 and 3000 kHz. No number stations here but monitoring the 160 metre amateur band is an interesting diversion, I had got into the habit of listening to a regular net on 1933 in the late evenings and also the Dutch music pirates which often show up around 1630 to 1700 or so. I was hoping this new interference was going to be something temporary but it has been on constantly for the best part of two months now.'

Much like the rest of us it seems the noise in the MW section has gone unpoliced from OFCOM [with shift to FM/DAB do they care?] although at least one minicab driver who carries us back from shopping has Dilsit Radio on MW on in his car. There's some very pleasant Indian Film Music to be had.

REO from En125; Tony writes an explanation:

Regarding your opening piece on RMP REO.

These REO messages (from Kaliningrad Oblast as you say) are Navigation warnings in general but also include other coded messages for the fleet. The frequencies are also used for other traffic.

REO is a collective callsign for – All ships, Baltic Fleet

They are sent out on multiple frequencies (not just the ones you mention) – probably from different sites. There are a number in the region. This would probably be the reason for the differences in the transmissions on the freqs you mention rather than any purpose to it.

Example below of transmissions from 22/2/21

As you'll see, different frequencies used for REO messages. The opening ones on 8627 are for different ships – likely orders. Then REO messages begin for remaining ships in fleet.

5179 kHz has the PROGNOZ POGODY (weather for region – didn't copy it down in this case)

Then various PRIPs – navigation warnings

Take the 1800z one

Many thanks Tony, this may be continued.....

Recommended Reading

In June two ENIGMA members met at London Victoria Railway station. Having evaded HMG's app for COVID testing etc we found a table and settled down to the business of espionage. First up were two containers of beer, one lager [excellent] and an ale [memorable taste]. Quickly squirreled away we took a delivery of our purchased requirements as two books were revealed. The first 'Daughters of the KGB' was being returned to me after a loan whilst that on the right, and by the same author was a loan to me.

I started this book straight away that evening on my return home. It was an invigorating read as it followed Mr Boyd's change from Mr to recruit in the RAF. He was not selected as a Brylcreem boy but as a Linguist or 'lingy' as they became to be known in the Y service. His language was Russian which he learnt at a variety of places; Crail and Tangmere spring to mind here.

He also learnt how to tune a radio as his task was to be the interception of Russian pilot's utterances. I'm not writing too much as this is a well recommended book and I don't want to describe the Set Rooms or what went on within in case I take too much away from the book.

I even made note in pencil on a piece of paper of interesting and useful phrases and bits of knowledge:

p36: s bol'shimi grudinkami

p59: Two interesting characters: Wingco Cash-my-Cheque

p60: Wiry Twerp and Japanese Joe

p61: A tick-tocking* airman, nicknamed 'Jingle Bollocks.'

[*Tick-tocking is marching with same arm advancing or retarding with the same leg as you march]. I served with someone with that nasty habit and met him again at my passing out parade at Hendon. Memorable indeed with a legion booze up the night before. No PACE then!

p94: Pucklechurch

p96: Batty's Belvedere

p98: Number Station transmission

p99: Ferret flights

p122: Descripton of the Set Room

There's lots more but I ran out of paper for notation so you'll have to look for yourselves. It's a very good read and I'll probably buy my own copy once I've returned this to the lending member.

This airman went across the divide into East Berlin [he was stationed at Gatow --- 499 to note here] and the silly bugger was nicked and passed on to the STASI. He was imprisoned and there's good description here of places where 499 and 613 have actually been; Not particularly a problem if you haven't but you'll read that Mr Boyd now has his own STASI file – just like the bloke who lent me the book. Pulled out in a Kensington Pub one Christmas it made brilliant reading; that member, as well as 499 and 613 have all been to the application office in the Normanstrasse offices after intercepting XPA1 b as it was from a room in an hotel not 300m away from the STASI HQ.

Anyway, Mr Boyd adequately describes how the STASI looked after him and his return to civilisation as we know it. Not Deutschland '83, '85 or '89 whatever but good and hard facts.

In the final chapters Boyd takes time to mention the film 'Das Leben der Anderen' - Lives of others which adequately paints the picture of STASI controlled East Germany.

On p171 he mentions an Intelligence Corps Corporal Brian Patchett who, employed as a Russian Linguist in the Royal Signals Detachment at RAF Gatow defected July 1963. That was interesting as it was one I will research further.

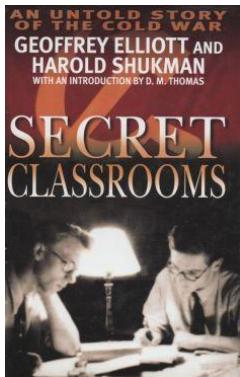

So, the final scale weighing for the book – it's a ripping yarn, true, and worthy buying.

Thanks to the most fluent member who took the trouble to lend!

For more on Brian Patchett who Mr Boyd mentioned was a bed-wetter as mentioned by his CO: [Brian Patchett \(langeleben.co.uk\)](http://BrianPatchett.langeleben.co.uk)

*There's a hand sketch of the set-room in this link, note the form of the figure 'I'

In his book, Mr Boyd mentions a book 'Secret Classrooms.' Written by Messrs Geoffrey Elliott and Shukman it was reviewed in ENIGMA2000 Newsletter issue 110:

Secret Classrooms: This excellent book by Elliott and Shukman outlines in good description the call up, selection of and training as Russian Linguists, RAF Tangmere, Bodmin, Crail and so on. The production of an in course newsletter 'Samovar' [The Joint Services School of Linguists in school magazine] is described and the sometimes hilarious and sometimes most serious subject is covered extremely well. It is a book that is a good, solid read. Took me just three days to exhaust and I re-read again, purely for the pleasure.

Geoffrey Elliott became an Investment Banker on demob, eventually retiring in Bermuda, whilst Harold Shukman became an Academic after taking a First in Russian Language and Literature at Nottingham University [*where yours truly met Geoffrey Perry OBE of Kettering Grammar School Sputnik fame during my time there*].

I read 'Secret Classrooms' in 2002; I was saddened to read of Harold Shukman's passing in the Times Obituary column 'Register' Friday October 12, 2012. He had died on July 11 aged 81.

An excellent, very worthwhile read about those who joined as 'oiks' but who left so much more prepared for the civilian life that awaited them, using the language they had become proficient in.

German police arrest Briton on suspicion of spying for Russia Employee at British embassy in Berlin suspected of passing on documents in exchange for cash

<https://amp.theguardian.com/world/2021/aug/11/german-police-arrest-briton-on-suspicion-of-spying-for-russia?>

German police have arrested a British man who worked at the British embassy in Berlin on suspicion of spying for Russian intelligence in exchange for cash bribes, according to prosecutors.

Germany's highest public prosecutor said the man, identified only as David S, was arrested at his Potsdam apartment at 2.20pm on Tuesday, and his home and embassy workplace were searched.

The 57-year-old Briton is understood not to be a diplomat but a private contractor working as a security guard at the Berlin embassy and therefore does not hold diplomatic immunity.

He is suspected of having worked for a Russian intelligence agency at least since November 2020, at least once passing on documents he had acquired through his work to a handler.

He is alleged to have been paid a cash bribe to pass information to Russian intelligence.

He is a British national and was under surveillance by British and German investigators, believed to have included MI5, but officials reluctant to discuss when that started.

The operation that led to David S being suspected was "intelligence-led".

He is alleged to have received cash payments of an as yet unspecified sum in exchange for information. Citing prosecutors' circles, the German news magazine Focus reported on Wednesday that the information passed on related to counter-terrorism issues.

Germany's public prosecutor said the arrest was the result of a joint investigation by German and British authorities. The Metropolitan police said the investigation into David S had involved Scotland Yard's counter-terrorism officers.

"The man was arrested in the Berlin area on suspicion of committing offences relating to being engaged in 'intelligence agent activity' (under German law)," the Metropolitan police said.

"Primacy for the investigation remains with German authorities. Officers from the counter-terrorism command continue to liaise with German counterparts as the investigation continues."

The Met's counter-terrorism command is responsible for investigating alleged breaches of the Official Secrets Act.

A spokesperson for the British Home Office said: "An individual who was contracted to work for the government was arrested yesterday by the German authorities. It would not be appropriate to comment further as there is an ongoing police investigation."

Nick Thomas-Symonds, the shadow home secretary, said the allegations potentially amounted to a "serious breach of UK national security".

"All measures must now be taken – urgently – to establish exactly what information has been passed to Russian intelligence and the impact this has on the UK, as well as that of our allies," he said.

"This is yet another example of the real threat posed by Russia, so it is unacceptable that Conservative ministers have been so slow to enact the measures necessary to protect the UK, including implementing the recommendations of the Russia report."

Michael Binyon's 'Kremlin's spies see Germany as a vital source of tech and military secrets' is well worth reading also
<https://www.thetimes.co.uk/article/kremlins-spies-see-germany-as-a-vital-source-of-tech-and-military-secrets-wdnbddmdf>

Interestingly in a piece sent to us by 'E' from the Metro and penned by Aidan Radnedge states, ' Sources claim Russia activated Smith, 57, as dissident Alexei Navalny lay in a Berlin hospital after a failed Novichok assassination bid, and MI6 agents arrived to monitor Kremlin spies.

The security guard was told to keep tabs on people arriving at the embassy, they say. One told the Mail on Sunday 'The city was full of Russian agents we wanted to keep an eye on. We think they used him as part of that cat and mouse.'

Full of Russian agents FFS! The Russian Embassy is a few minutes' walk from the British Embassy and just a tad further from the US Embassy. SEE BELOW:

As seen/plotted by the Joint Welsh/Londoner mission to Berlin in 2010.

Spoken about on the morning of 24th August 2021 during a telephone call between the two participants and in which Kipling's 'Mandalay' was recited.

Russian army officer handed eight-year prison sentence for espionage

July 02, 18:23

KRASNODAR, July 2. /TASS/.

<https://tass.com/society/1309973/>

A court in the Krasnodar Region sentenced Andrei Pikula, previously detained by the Federal Security Service (FSB), on charges of being recruited by a foreign intelligence service, the court press service said Friday.

"The Krasnodar District Court has completed reviewing the criminal case against Andrei Pikula, born in 1991, charged with [espionage in the form of collecting and passing information constituting a state secret to a representative of a foreign state]. The court concluded that the defendant's guilt had been proven. The court has considered the mitigating circumstances, and sentenced the defendant to a penalty below the lowest possible under Article 275 - to eight years in prison," the court said.

The defendant had a military rank of reserve lieutenant, but was stripped of it by the court's ruling.

According to the press service, the defendant pleaded guilty. The investigation uncovered that he was recruited by a foreign intelligence agent in 2018, and was tasked with collecting classified information. He carried out his mission in 2019, and handed over information to a foreign intelligence service until his actions were thwarted by the FSB Krasnodar Region Directorate.

Ex-CIA officer accused of spying for China has memory issues

JENNIFER SINCO KELLEHER

Fri, 30 July 2021, 1:24 am·1-min read

<https://uk.news.yahoo.com/ex-cia-officer-accused-spying-002426012.html>

HONOLULU (AP) — A former CIA officer accused of spying for China is asking for a mental competency evaluation after telling his attorney he believes he is suffering from the early stages of Alzheimer's disease and is having trouble remembering things.

Alexander Yuk Ching Ma, a former CIA officer and contract linguist for the FBI, was arrested last year after an undercover operation in which prosecutors say he accepted thousands of dollars in cash in exchange for his past espionage activities. He told a law enforcement officer who was posing as a Chinese intelligence officer that he wanted to see the “motherland” succeed and that he was eager to resume helping China after the coronavirus pandemic subsided, prosecutors said.

Ma's court-appointed attorney, Birney Bervar, said Thursday that he felt compelled to file a motion for a mental competency evaluation after meeting with Ma a couple of weeks ago.

“Ma said he just can't remember things and that he believes it impairs his ability to assist properly in his defense,” the motion said.

Bervar's motion also noted that Ma's older brother developed Alzheimer's 10 years ago and is now completely disabled by the disease. The brother is referred to as a co-conspirator in the indictment against Ma, but prosecutors didn't charge him because of his incompetency due to Alzheimer's, the motion said.

A magistrate judge scheduled a hearing for Aug. 12 on the motion.

Two types of terror threat will emerge in wake of Afghanistan fall, says former head of MI5

By Sarah Harvey

<https://www.standard.co.uk/news/uk/terror-threat-afghanistan-mi5-jonathan-evans-b951539.html>

Two types of terror threat will emerge in Afghanistan over “the coming months and years,” former MI5 chief Lord Jonathan Evans has said.

He told BBC Radio 4's Today programme: “I think there are two problems - I think there is more operating space more likely to be available to groups like al Qaeda, and there have been reports of Islamic State elements present in Afghanistan.”

“If they get the opportunity to put down infrastructure to train and to operate then that will pose a threat to the West more widely.”

“There's also the psychological effect of the inspiration that some people will draw from the failure of Western power in Afghanistan.”

“So, I think, in practical terms and in terms of ungoverned space, but also in psychological terms, it probably does mean an increase in threat over the coming months and years.”

Before the fall of Afghanistan the former chief of the Secret Intelligence Service, Sir Alex Younger, told Sky News that “the terror threat to Britain will grow if the West abandons Afghanistan”.

It comes as the chief of defence staff, General Sir Nick Carter, said the Taliban may be more moderate than their 1990s counterparts.

Sir Nick said the Taliban did not want to become “international pariahs” and said, “I do think they have changed”.

Despite this there were growing reports on Friday that Taliban fighters were going door-to-door in Kabul looking for those who had worked with the previous regime, and threatening them into joining the Taliban.

Tens of thousands of Americans and Afghans who collaborated with US forces remain stranded in Kabul, as the US government grappled with a backlog of visas.

French spy agency DGSI emerges from shadows with first website

Issued on: 08/07/2021 - 09:52

The DGSI website aims to demystify the agency's activities to millions of French people. AP - Stephane de Sakutin
Text by: Amanda Morrow with RFI

<https://www.rfi.fr/en/france/20210708-french-spy-agency-dgsi-emerges-from-shadows-with-first-website?>

France's intelligence agency, the DGSI, has launched its first website – giving ordinary folk a peek at its top secret missions fending off terrorism, cyberattacks, foreign spies and more.

A year in the making, the website is a PR tool of sorts. It aims to demystify the agency's activities to millions of French people who are either unsure what it does, or who believe it was created to monitor the population.

Described as “a tool for contact and exchange”, the new online address also gives individuals another avenue for reporting a person suspected of having been radicalised.

“All of the world's major intelligence services have dedicated website,” DGSI director general Nicolas Lerner told a press conference Tuesday at the agency's headquarters in the Paris suburb of Levallois-Perret.

“We have an obligation to publicise what we do.”

Advice, info, quizzes

As well as offering practical advice on how to protect oneself from cyberattacks, the DGIS website warns citizens of the unscrupulous methods used by foreign spy agencies to recruit sources and collect sensitive information.

"A professional manipulator, a spy will first show sympathy and interest in the private life and activities of the person they are targeting," it cautions.

Sky's the limit as space drills show off French military prowess
What pushed General Lecointre to step down as head of French armed forces?
"They are an enlightened strategist who will do everything in their power to trap their target in an insidious spiral from which that person will not be able to extricate themselves without outside help."

The website also offers a virtual museum packed with unusual objects related to the world of espionage – think James Bond-style gadgets – as well as quizzes for young people who might one day want to become secret agents.

Then there's info on how the service has been set up, the legal framework under which it operates and a list of the modern defence challenges it faces.

Active recruitment

Created in 2014, the DGSI is the resulting merger of two police services – the General Intelligence and the Directorate of Territorial Surveillance. It actively recruits hundreds of agents every year, boasting a team of almost 5,000 men and women.

The testimonies of some of those agents can be found on the website, where would-be agents can also lodge their job applications.

"Talking about the secret activities of an intelligence service is complicated," Lerner said.

"But it is precisely because we are a service whose activity is classified that we have a strong obligation to talk, to explain and to make known who we are."

This next article worth opening for the imagery

For your eyes only: MI5 shares unseen images of its former Mayfair HQ, where 'Registry Queens' carried out phone-tapping

The security service posted images on its Instagram account on Thursday
Collection of just five images showed its one-time base at 1-4 Curzon Street

The intelligence agency was based there from 1977 until 1994

By HARRY HOWARD, HISTORY CORRESPONDENT and ED WIGHT FOR MAILONLINE

PUBLISHED: 01:22, 9 July 2021 | UPDATED: 01:25, 9 July 2021

<https://www.dailymail.co.uk/news/article-9769759/MI5-shares-unseen-images-former-Mayfair-HQ-Registry-Queens-carried-phone-tapping.html>

It was founded 112 years ago amid escalating tensions with Imperial Germany.

Since then, MI5's spies have worked in the shadows to snoop on targets, foil bomb plots and keep leading politicians informed.

But now, the domestic intelligence agency, which is also known as the Security Service, has said goodbye to secrecy and revealed the inside of its former Mayfair base for the first time.

Posting the 'for your eyes only' pictures on its Instagram account, the spy agency said: 'More than 25 years after MI5 left the building for the last time, we're now pleased to be able to share some rare images of our Curzon Street office, the home of MI5 between 1977-1994.'

The collection of five photos shows female intelligence officers at their desks at 1-4 Curzon Street, known as 'Curzon Street House', where the Security Service housed its registry, administration and technical services departments.

The female staff were known as 'Registry Queens' and it was here that phone-tapping and other electronic surveillance methods were monitored.

The collection of five photos shows female intelligence officers at their desks at 1-4 Curzon Street, known as 'Curzon Street House', where the Security Service housed its registry, administration and technical services departments. MI5 vacated the building in 1994

In one photo, a dark-haired spy is seen listening back to a reel of tape, presumably of a covert surveillance.

Another photo shows an office with women apparently listening to recordings.

A third shows a female officer changing a spool of tape on a machine.

Built in the 1930s, the most noticeable feature of the building was the absence of windows on the street level.

Higher floors were hidden by weighted net curtains to prevent prying eyes.

In one photo, a dark-haired spy is seen listening back to a reel of tape, presumably of a covert surveillance

Another photo shows an office with women apparently listening to recordings

A third image shows a female officer changing a spool of tape on what appears to be a recording device

Instagram goes inside MI5: Spies post first picture from...

Writing on Instagram, MI5 added: 'Although there was never any official mention of MI5's offices at Curzon Street, bus conductors and taxi drivers were far less discreet.'

'One former colleague recalls, "When you got off the bus in Park Lane the conductor would shout down the bus 'Curzon Street and MI5' and all of us would troop off looking somewhat embarrassed!"'.

Prior to moving to 'Curzon Street House', MI5 housed its registry department on the ground floor of the street's Leconfield House.

Also seen in the collection is an image showing a series of machines on wheels. Writing on Instagram, MI5 added: 'Although there was never any official mention of MI5's offices at Curzon Street, bus conductors and taxi drivers were far less discreet. One former colleague recalls, "When you got off the bus in Park Lane the conductor would shout down the bus 'Curzon Street and MI5' and all of us would troop off looking somewhat embarrassed!"'

It was there that in famous MI5 whistleblower Peter Wright was based before he wrote his explosive book Spy Catcher following his retirement.

He revealed how the service 'bugged its way across London' and also alleged that MI5 boss Sir Roger Hollis was a Russian spy.

The book was published first in Australia but was initially banned in England due to Wright's explosive allegations.

Prior to moving to 'Curzon Street House', MI5 housed its registry department on the ground floor of the street's Leconfield House

However, the book was still available elsewhere and the attempted censorship only increased its popularity.

In mid-1987, a previous ban on English newspapers reporting about the book was lifted.

A year later, the book was cleared for sale and sold more than two million copies, making Wright a millionaire when he died in 1995.

Since 1994, MI5 has been based at Thames House, a building it had previously occupied in the 1930s.

It's post on Thursday came after the service joined Instagram in April. In its first post, it shared a picture from the lobby of its Thames House headquarters.

It said @mi5official will 'bust popular myths about its work, provide explainers for intelligence terminology, promote career opportunities and bring to life events in MI5's 112-year past'.

Earlier this year, MI5's director general Mr McCallum said he wanted the traditionally highly secretive agency to 'open up and reach out in new ways'.

'Much of what we do needs to remain invisible, but what we are doesn't have to be,' he said in his first media engagement in October, after taking up the job in late April.

'In fact, opening up is key to our future success,' added McCallum, a MI5 veteran of more than 25 years who oversaw all counter-terror operations around the 2012 London Olympics.

Pentagon Sees China's Offensive Space Technology 'On the March'

By Anthony Capaccio

10 July 2021, 10:00 GMT

China is investing in weapons to jam, destroy U.S. satellites
Beijing seeks to narrow gap in space technology with U.S.

<https://www.bloomberg.com/news/articles/2021-07-10/pentagon-sees-china-s-offensive-space-technology-on-the-march>

China is making sizable, long-term investments in weapons designed to jam or destroy satellites as the nation seeks to rapidly narrow the gap in space technology with the U.S., according to the top intelligence official for the Pentagon's Indo-Pacific command.

China is pushing to develop antisatellite weapons with capabilities from "dazzling to jamming, to kinetic kill-from-the-ground, from space -- all that, they're on the march," Rear Admiral Michael Studeman said this week during an intelligence-security trade group's webinar.

Studeman's comments mark the most current unclassified assessment of the counter-space capabilities of a nation that Defense Secretary Lloyd Austin repeatedly refers to as the top challenge for U.S. defense planning and spending.

China's threats to U.S. satellites as well as Russian advances in counterspace technologies were among the primary justifications American officials cited for establishing the U.S. Space Force, the sixth U.S. military service branch and the regional Space Command, during the Trump administration.

"They take a look at our space capability and want to equal and exceed those and be able to dominate to guarantee themselves the maneuvering they need to be able to secure their objectives if they're in a fight," Studeman said.

The U.S. Office of the Director of National Intelligence said in April that the Chinese military "will continue to integrate space services -- such as satellite reconnaissance and positioning, navigation, and timing and satellite communications -- into its weapons and command-and-control systems to erode the U.S. military's information advantage."

Developing so-called counterspace operations will be integral to a potential military campaign, the DNI said. Beijing continues to train its military space elements and "field new destructive and nondestructive ground- and space-based antisatellite (ASAT) weapons," the intelligence office said in its annual Threat Assessment report.

It has "already fielded ground-based ASAT missiles intended to destroy satellites in low-earth orbit and ground-based ASAT lasers probably intended to blind or damage sensitive space-based optical sensors" on low-earth orbit satellites, according to the report.

The House Appropriations Committee, in a draft report on the fiscal 2022 defense bill obtained by Bloomberg Government, signaled its concern over “the growing threats posed by ground-based lasers capable of damaging or destroying sensitive space sensors in low-orbit, and the lack of a coordinated strategy to understand this threat and develop concepts to mitigate its risks.”

Without mentioning China, the report directed the Pentagon, in coordination with the ODNI, “to provide a plan to collect, consolidate, and characterize laser threat activity data of potential adversaries, and to develop strategies to mitigate these threats.”

Aside from destructive counterspace technologies, China also is pursuing parallel programs for military and commercial communications satellites and owns and operates about 30 of those for civil, commercial and military satellite communications, the Defense Intelligence Agency said in 2019. Beijing also operates a small number of dedicated military communications satellites.

The U.S. has a “substantial amount of activity going on on our side” as “we recognize the threat here,” Studeman said. “It will be a game of measures and countermeasures and counter-countermeasures for some time to come.”

A top U.S. counterspace weapon designed to temporarily jam but not destroy Chinese and Russian satellites is known as the Meadowlands system. The U.S. Space Force is building an arsenal of as many as 48 of these ground-based weapons over the next seven years and declared the first one operational in March 2020.

Hunter becomes hunted as Royal Navy helicopters hound Russian submarines

Dominic Nicholls

Fri, 9 July 2021, 5:05 pm

A Russian submarine stalked the Royal Navy’s Carrier Strike Group (CSG) prompting a helicopter hunt for the vessel, The Telegraph can reveal.

Merlin helicopters were scrambled to search for the Russian submarine when the group was passing through the eastern Mediterranean.

The two aircraft dropped sonobuoys - equipment designed to sink beneath the water to find submarines - to listen for its distinctive sounds after it was suspected to be monitoring HMS Queen Elizabeth, Britain’s new aircraft carrier, and escort ships.

The hunt for the submarine took place four days after the confrontation in the Black Sea between HMS Defender, a Type-45 air defence ship, and Russian forces.

Russian submarines are known to be active in the eastern Mediterranean from the Tartus naval base on the Syrian coast.

Their primary mission is to lurk just off the coast of Cyprus, monitoring RAF aircraft launching from RAF Akrotiri to strike Daesh targets in Syria.

It is not known if the Russian boat - understood to be a diesel-electric Kilo-Class submarine from the Black Sea fleet - was caught unawares as it monitored British air operations, or if it was diverted specifically to spy on HMS Queen Elizabeth.

Two Merlin Mk2 submarine-hunting aircraft were launched, one from HMS Queen Elizabeth, the other from the Royal Fleet Auxiliary ship Fort Victoria, a replenishment tanker.

It is not known if the USS The Sullivans, an American destroyer, or HNLMS Evertsen, a Dutch frigate, both contributing to the CSG, took part in the mission.

The Telegraph understands at least one sonobuoy was dropped from the Merlins.

There are seven such helicopters deployed with the group, and these would likely have been operating in coordination with other anti-submarine assets. These include the two Type-23 frigates HMS Kent and HMS Richmond and the Royal Navy’s deployed hunter-killer submarine, thought to be HMS Astute or HMS Ambush.

While the MoD refused to confirm the incident, understood to have occurred on June 27, it said “robust measures” were in place to protect the CSG, which is on its first operational deployment.

Defence sources have suggested the suspected Kilo-Class would likely have come from Moscow’s Black Sea fleet.

Ryan Ramsey, a former Royal Navy submariner and commander of the world-renowned Perisher training course, said: “Submarines aim not to be detected – it stops you completing your tasks.

“Evasion in a submarine is really difficult when you’re going up against something as capable as Merlin helicopters. The UK has always been really effective at anti-submarine warfare using ships, submarines and aviation.

“When I was teaching the submarine command course, Perisher, it was the Merlins that the student captains worried about the most. I’m sure the opposition are doing the same thing.”

The Russian Navy is thought to operate only diesel-electric boats in the Mediterranean, preferring to keep its nuclear powered submarines - capable of long passages submerged - in the North Atlantic, where they mainly shadow Britain’s nuclear deterrent.

Although older boats, diesel-electric submarines are quieter than nuclear powered vessels as they operate only on battery power when submerged.

However, they periodically need to hover near the surface of the ocean and run their diesel engines to replenish the batteries.

They use a “snort mast” to extend above the water to draw in air. This dustbin-sized piece of kit has a radar signature detectable to Merlin helicopters.

The Merlin Mk2 fleet of helicopters entered service in 2014 as an upgrade for the original 1990’s Mk1 naval version. It is the Royal Navy’s principal airborne anti-submarine warfare capability.

There are 30 Mk 2 aircraft in the fleet and each one carries a crew of five. They can be armed with Sting-Ray Torpedoes, Mk11 Depth Charges and the M3m .50 Calibre machine gun.

A Ministry of Defence spokesperson said: "We do not comment on operational matters of this kind, but can confirm that robust measures are in place to protect HMS Queen Elizabeth and the ships of the UK Carrier Strike Group."

Since the incident in June, HMS Queen Elizabeth has led the CSG through the Suez Canal. The group is thought to be about to enter the Indian Ocean, on the next phase of its eight-month deployment to the Indo-Pacific.

Military chief reveals secret new role for special forces against China and Russia

Larisa Brown, Defence Editor

Saturday July 17 2021, 12.01am, The Times

<https://www.thetimes.co.uk/article/military-chief-reveals-secret-new-role-for-special-forces-against-china-and-russia-hgbdwcs7>

Britain's special forces will take on a new covert mission against China and Russia as they shift their focus to countering "big state adversaries", a senior military chief has revealed.

Brigadier Mark Totten said that the SAS and SBS would have more time and assets for "higher risk" counterstate tasks requiring more detail, planning and specialist expertise. The Royal Marines will take over the units' traditional roles.

Army sources said special forces might be given "politically treacherous" tasks such as training the navies of countries near the South China Sea to better defend against Chinese hostility.

Totten is in charge of a 4,000-strong "future commando force" of Royal Marines who will "burden-share" with Britain's elite units. They will base themselves in small numbers around the world carrying out counterterrorism operations, deterring mercenaries and responding to crises.

They will also use technology such as fish drones and artificial intelligence, and carry out "deception" operations with fake signals or diversionary forces to confuse an enemy.

Totten, who joined the Marines in 1998, said: "What we will be able to do is allow [special forces] to focus on more difficult, more complex, counter-Russia, counter-China [tasks]. It takes real specialist expertise, so we will allow them to have more time and people to address those and we can conduct some of the tasks, such as maritime counterterrorism for example, or partnered operations, where it is difficult, where there is a higher risk."

His comments are the first official acknowledgment that special forces will be tasked with tackling the threat from China and Russia. Normally the government does not comment on the activities of the troops, although earlier in the year the head of the army, General Sir Mark Carleton-Smith, admitted they would be asked to take on "hostile states" more generally.

It is thought the highly secretive operations could involve troops operating alongside MI6 to mount surveillance against Chinese and Russian intelligence and military units. Part of their job will be to track adversaries and build a picture of the changing and "accelerating" nature of the threat.

An army source said: "You're not going to get a gang of guys running around China."

However, the source said they could, for example, pop up around the South China Sea to train other navies in sensitive situations.

"You could send 25 guys from special operations to Africa carrying out counterterrorism and send four guys from the SAS to somewhere in the South China Sea as this would need to be lower profile and is politically more treacherous." Totten, who has served tours of Iraq and Afghanistan, said melting ice caps in the Arctic could open sea routes for Russia and China, adding: "There's a big geopolitical shift there so why wouldn't we embed the commando force up there to be ready to react?" Royal Marines will also be deployed east of Suez and could go to the Indo-Pacific ready for any conflicts that may arise. He said they could provide teams that could conduct training and "if there is a crisis that bubbles up we've got a footprint on the ground."

At present Marines have to deploy from RAF Brize Norton, Oxfordshire, or from Plymouth, and sometimes the critical moment has passed before they can arrive.

They could also act as a deterrent to the Wagner Group, Russian mercenaries believed to be carrying out the Kremlin's bidding, by having a presence in countries where they would not normally be.

"I'm not saying that we will move into a direct confrontation as in military to mercenary but . . . you don't make it easy for them because they have to think about what we are doing and what we will see," he said, adding that it was an "indirect" way of taking them on.

The army will also get a Rangers regiment for special operations, easing pressure on the SAS. Modelled on the US Green Berets, it will have its first mission in Africa.

The role of Britain's special forces has always been highly secretive (Larisa Brown writes). The government does not deny or confirm their operations. The highly-trained troops carry out the most dangerous missions, including behind-the-lines operations, undercover raids, counterterrorism, hostage rescue, reconnaissance and surveillance.

After the Manchester Arena terrorist attack in May 2017, members of the Special Air Service (SAS) were spotted on the streets alongside police carrying out raids. Elite soldiers were also deployed to Syria to help in the fight against Islamic State, along with missions in countries like Libya, Afghanistan and more recently Mozambique.

A shift to focusing on threats from hostile states such as China and Russia comes amid concerns that such states are becoming more brazen in their attacks.

The line between peace and war is becoming increasingly blurred, with states using deniable proxy forces, cyberattacks, and crude ways of sowing doubt and confusion such as misinformation campaigns and GPS "spoofing" that can take ships off course. Ministers have accused Russia of not playing by the "international rulebook".

It is thought that the highly-secretive special forces operations could involve troops operating alongside MI6 to mount surveillance operations against Chinese and Russian intelligence and military units. Part of their job will be to track adversaries and build a picture of the changing and "accelerating" nature of the threat.

US plots spy base in UK to counter space threats from Russia and China

[*Not another one!*]

Defence Secretary Ben Wallace said the radar system would focus not on ‘wrecking space but defending and protecting space’.

By Poppy Wood

July 17, 2021 10:33 am(Updated 11:30 am)

<https://inews.co.uk/news/uk/us-spy-base-uk-space-satellite-threats-russia-china-1108675?>

The US has announced plans to build a space base in the UK in a bid to stave off “threats” posed by Russia and China and to probe deep space.

The US Space Force is developing a global radar system that can identify potential “targets” the size of footballs up to 22,000 miles away.

Three sites have been earmarked as sites for the new scheme, including one in southern England or Scotland, and two more in Australia and Texas. Current plans are for the first base to be operational by 2025.

Each site is set to house between “10 and 15 satellite dishes for tracking” and “four to six for transmitting”, each measuring around 15 metres in diameter.

The Ministry of Defence said the new radar capability has the potential to make space “safer and more secure”, amid growing concerns about congestion and competition in space.

Defence Secretary Ben Wallace and other UK defence chiefs visited the US Space And Missile Systems Center in Los Angeles this week to discuss the plans, known as Deep Space Advanced Radar Capability — or DARC.

Speaking at the event, Lieutenant Colonel Jack Walker said the new system was “necessary because we want to keep chain-of-custody of targets that could threaten our systems that are in geosynchronous orbit”.

He told Sky News: “It could be satellites or it could just be debris from rocket bodies from other launches.”

Air Chief Marshal Sir Mike Wigston, the head of the Royal Air Force, added that it would help the UK “defend our critical infrastructure in space”.

“Right now, there are countries like Russia and China that are doing things, developing systems that are … a threat to satellites that we rely on in our day-to-day lives,” he said.

Both the US and Britain have accused Russia and China of developing weapons that can be used to take out satellites in recent years. Last year, 1,000 new satellites were launched into space, including 10 by the US military.

The US already operates an early warning system to detect ballistic missiles in space, including a service at RAF Fylindales in North Yorkshire.

However, it can only detect objects around 12,400 miles away, and is therefore far less powerful than DARC would be.

Speaking at the event in California, Mr Wallace said the new radar system would focus not on “wrecking space but defending and protecting space”.

War in space is a growing threat – with hypersonic missiles and lasers to shoot down satellites

“It wouldn’t be like Star Wars or Moonraker with lasers firing all over the place… I suspect in a major conflict, space assets would be targeted. So we have to invest and prepare today to make sure we have alternatives,” he added.

A Ministry of Defence spokesperson said: “This new radar capability has the potential to make space safer and more secure, helping to protect our satellite system by tracking and monitoring objects.

“We are exploring our potential partnership with the USA on DARC and discussions so far have been positive.”

Putin offers US his foreign bases to spy on Taliban

Marc Bennetts, Moscow | The Sunday Times

Sunday July 18 2021, 6.00pm, The Times

<https://www.thetimes.co.uk/article/putin-offers-us-bases-in-central-asia-to-spy-on-taliban-vkh193ezp>

A Russian newspaper suggested that bases in Kyrgyzstan and Tajikistan have been offered to the US

The Kremlin has unexpectedly offered Washington the use of its military bases in Central Asia to gather intelligence from Afghanistan.

President Putin is said to have made the proposal during his summit meeting with President Biden in Geneva last month.

The Kommersant newspaper cited sources to claim that Putin, 68, suggested that the United States military use bases in Kyrgyzstan and Tajikistan to collect information, including through drones flown across the border, on the security situation in Afghanistan. It is unclear whether any US troops would be stationed permanently at the bases.

Russia’s biggest foreign base, with about 6,000 soldiers, is in Tajikistan. Russia also has a smaller base in Kyrgyzstan, about 500 miles away from the Afghan border.

Both countries are former Soviet states and members of the Collective Security Treaty Organisation, a Russian-led military bloc.

The daily newspaper said that Washington had not given a final answer to the proposal, while the Kremlin has not commented on the report.

The Taliban has seized large swathes of Afghanistan as America prepares to pull out the last of its forces by September 11. The Islamist group recently claimed to control about 85 per cent of the country.

The withdrawal of the US troops after 20 years poses a dilemma for the Kremlin.

Moscow fears that the rapid advance of the Taliban could spark turmoil in Central Asian states near the Russian border. Putin said last year that a US military presence in Afghanistan had helped bring stability to the country.

The Kremlin is also concerned, however, that any redeployment of US troops in the region could pose a threat to its national security. Moscow said last week that it had “directly and bluntly” warned the US not to open new military bases in former Soviet countries that neighbour Afghanistan. It said that such a move would be “unacceptable” for Russia.

Antony Blinken, 59, the US secretary of state, held talks recently with the foreign ministers of Tajikistan and Uzbekistan as Washington tries to maintain a security presence in the region.

Analysts say, however, that neither country would be able to host a US base without approval from Russia.

Sergei Lavrov, the Russian foreign minister, said on Friday that the “hasty withdrawal” of US and Nato forces from Afghanistan threatened the future of the country.

He also said that the crisis had exacerbated the threat of terrorism and increased drug trafficking to “an unprecedented level”.

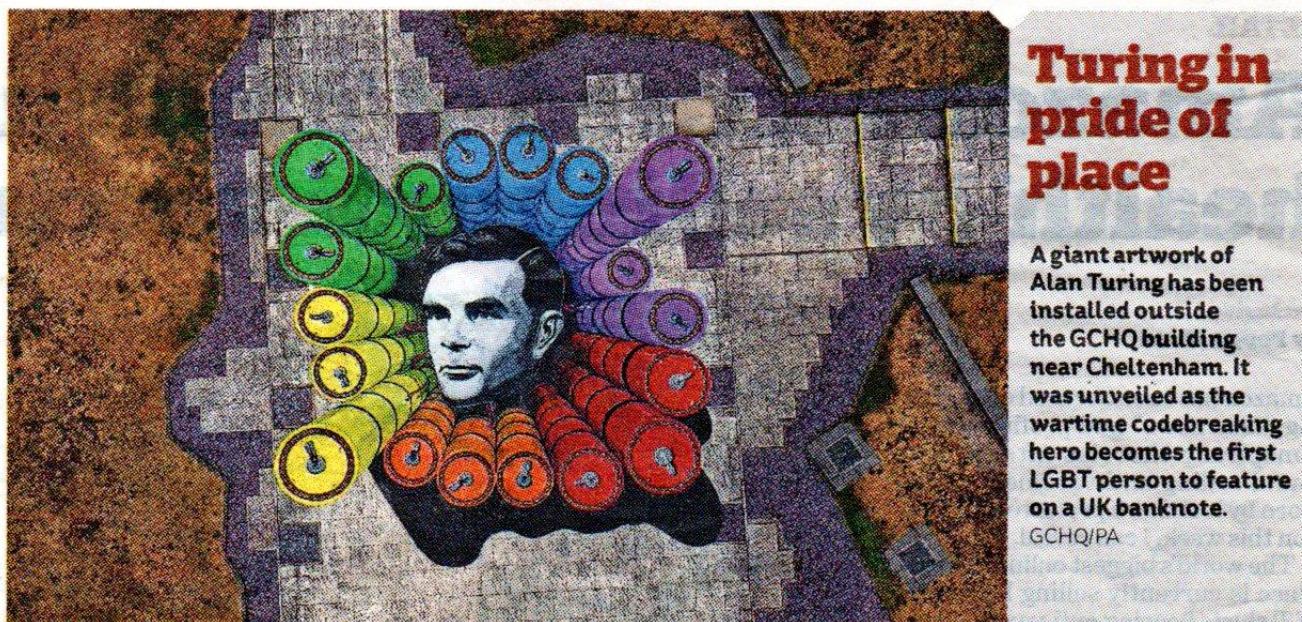

The Kremlin has urged Afghanistan’s pro-western government to negotiate with the Taliban, while Moscow has said that it wants to help kickstart talks between the warring sides.

A Taliban delegation visited Moscow this month for talks. The Kremlin said that the Islamist group had pledged not to attack its neighbours. The assurance did little to assuage Russian fears about instability.

Military drills were held in Tajikistan last week involving combat helicopters and 1,000 troops. The Izvestia newspaper reported that joint exercises were scheduled to be held with the Tajik military, as well as in neighbouring Kyrgyzstan and Uzbekistan, next month and in September.

Those drills will involve motorised rifle and mountain units, special forces, artillery, as well as Russia’s S-300 missile systems.

	1800z	27 Jul	NRH		BR	TUE
	1800z	29 Jul	'025' 130 30 == 96209 ==	V.Weak, fast. Ending heard via Polish SDR	BR	THU
6435	1500z	10 Jul	'025' 461 30 == 39210 ... 05680 ==	Weak / fair, med-fast. Excellent Morse. No noted errors	BR	SAT
	1500z	17 Jul	'025' 331 30 == 46372 ... 47382 ==	Fair, fast. Many groups run together with no pause	BR	SAT
	1500z	24 Jul	'025' 306 30 == 46537 ... 57832 ==	Weak, fast. Many grps joined as single stream. Poor sigs	BR	SAT
	1500z	31 Jul	'025' 330 30 == 12341 ... 94850 ==	Fair, fast. Several errors noted. Ended 0.0.0.	BR	SAT
6780	0700z	18 Jul	'025' 806 30 57483 ... 46573	Fair/Good, med-fast. Grp26 sent twice. == not sent	BR	SUN

August 2021:

4905	2000z	03 Aug	'025' 586 30 == 37554 ... 43459 ==	Good, fast. Good Morse. Two errors noted grp01 & 26	BR	TUE
	2000z	10 Aug	'025' 963 30 == 34345 ==	Good, slow. Missed first part of transmission	BR	TUE
	2000z	12 Aug	'025' 567 30 == 84937 ... 71645 ==	Good, fast. High noise. Numerous errors. Ended 0.0.0.	BR	THU
	2000z	19 Aug	'025' 501 30 == 47562 ... 68234 ==	Good, fast High noise / local QRM.	BR	THU
	2000z	26 Aug	NRH		BR	THU
	2000z	31 Aug	'025' 252 30 34561 ... 17413	Fair, fast. Excellent Morse. == missing at start & end	BR	TUE
5280	1800z	03 Aug	NRH		BR	TUE
	1800z	10 Aug	'025' Weak, slow. Some groups readable but mostly no useful copy		BR	TUE
	1800z	12 Aug	'025' Call-up started weak / fair. Faded to very weak before msg. No useful copy		BR	THU
	1800z	17 Aug	'025' Very Weak – No useful copy		BR	TUE
	1800z	26 Aug	'025' Very weak, fast. No useful copy		BR	THU
	1800z	31 Aug	'025' 227 30 == 95748 ==	Fair/Good, fast via Groningen D. SDR. Errors noted	BR	TUE
6435	1500z	07 Aug	NRH		BR	SAT
	1500z	14 Aug	'025' 214 30 == 58790 ==	Weak/fair, fast. QSB made copy difficult	BR	SAT
	1500z	21 Aug	'025' Very weak, fast. Mostly unreadable. No useful copy		BR	SAT
	1500z	28 Aug	'025' 812 30 == 43562 ... 37512 ==	Fair, fast. Errors noted. Fair sig. with QSB via Twente	BR	SAT

M01a (From Feb 2016 M01a has been redefined to cover all M01 variants - excepting M01b)

A number of regular schedules have been reported & Logged by Edd Smith – See ENIGMA 2000 Newsletter 116 for details.

Logs are shown as continuous. In practice there are often pauses between lines – Often quite lengthy pauses.

M01a Schedule Wednesday 14 July

9129	0530 (IP) - 0533z	14 Jul	498 (x3) 53173 (x2) (Repeated)	(Via SDR Novosibirsk)	E.SMITH	WED
111 0 0 0						
9192	0530z	14 Jul	NRH			

7692	0540z	14 Jul	NRH
9421	0620z	14 Jul	Not Monitored
8111	0630z	14 Jul	Not Monitored
9175	0710z	14 Jul	NRH
8078	0720z	14 Jul	NRH

M12 IB ICW, some MCW / CW, short 0. Reuses many freqs year on year.

New ID's may be only for the month/sched shown, but not necessarily unknown. The reason for their reuse, some after long periods of time is unknown.

AUJOURD'HUI, CES VALEURS, CETTE TRADITION, CETTE COHÉSION EXEMPLAIRE MAIS AUSSI
CETTE INTÉGRATION RÉUSSIE FONT PARTIE DE LA RICHESSE NATIONALE. NOTRE JEUNESSE EST
UN ATOUT POUR NOTRE PAYS ET POUR L'EUROPE ET JE SAIS COMBIEN NOS ARMÉES SAVENT
DÉVELOPPER LEURS ÉNERGIES ET LEURS TALENTS. LA FRANCE AURA PLUS QUE JAMAIS BESOIN
DEMAIN, DANS UN MONDE INSTABLE, D'ARMÉES DE TRÈS HAUT NIVEAU. J'ASSUMERAI
PLEINEMENT LES RESPONSABILITÉS QUI SONT LES MIENNES POUR DÉFINIR, SOUS LA DIRECTION
DU PRÉSIDENT DE LA RÉPUBLIQUE ET DU PREMIER MINISTRE, L'AVENIR DE NOTRE SYSTÈME DE
DÉFENSE ET LES REFORMES QUI SONT NÉCESSAIRES À NOTRE PAYS ET À NOS ARMÉES AINSI QU'A
LA VALORISATION DE NOS INDUSTRIES. +

Marker Beacons (MX MXI)

Firstly, an item of historic interest:

"...A long time mystery regarding the Soviet 'U' channel markers.

The 'U' marker disappeared from the airwaves in the spring of 1990. I have recorded an occasion when the 'U' marker ran on 13 frequencies simultaneously! My colleague, A. Stelingis confirmed that these channels were continuously monitored at the jamming correction and control posts.

The 'U' channels were used to transmit orders to the jammers - most likely to issue jamming frequency time and schedules. It must have been that 'U' channels were used as backup instead of the teletype link to Moscow. (It is also believable that the 'U' marker on the shortwave bands was used for civil defence and other purposes).

It is worthwhile to note that when the USSR ceased its jamming on 30 November 1988, the 'U' markers transmitters continued to operate for another 18 months! This would indicate that throughout most of the USSR jamming system continued to be kept ready to start again."

Thank you all for your logs.

Of carriers PoSW writes:

There has been mention in the Newsletter from time to time of plain carriers and a couple of examples were noticed in late August which appeared to be connected with the STANAG 4285 noise-maker operation:-

22-Aug-21, Sunday:- 1356 UTC, 6414 kHz, very strong signal, not just a plain carrier but modulated by audio tone, steady enough to give a reading on a frequency counter coupled to the low-level audio output on the receiver, displayed 605 – 606 Hz. Was on when checked throughout the day and on the following day, Monday the 23rd, and still there on Tuesday the 24th at 0730 UTC. However, was gone when monitored at around 1500 UTC when there was a strong "XJT" on this frequency, or very close to it.

The second example:- 26-Aug-21, Thursday:- 1817 UTC, 6786 kHz, very strong carrier, unmodulated, still on when checked at 1905, 2015 and 2120 UTC; was not there at 0825 UTC on the 27th but there was an S9+ "XJT" churning away.

Also, what sounded like an XJT showed up inside the 40 metre amateur band for a short while in early August:-

2-Aug-21, Monday:- 1513 kHz, 7103 kHz, very strong "XJT" on this frequency, still on at 1910 UTC. No sign at 0615 on the following day or at 0945 UTC but was heard at 1216, weaker than previously, not there at 1825 UTC and not heard since.

Voice stations, Polytones and Hybrids

Regarding E06 Peter makes the following observations:

Not much to report on the E06 English Man, was active on many schedules not so long ago. The following appears by courtesy of the prediction list.

First + Third Thursdays in the Month 0500 + 0600 UTC Schedule:-
15-July-21:- 0500 UTC, 13825 kHz, calling "679", DK/GC "243 243 50 50", weak signal.
0600 UTC, 15615 kHz, second sending, also weak.

16-July-21, Friday:- 0500 UTC, 13825 kHz, the expected repeat on the following day, weak.
0600 UTC, 15615 kHz, weak.

5-Aug-21:- 0500 UTC, 13540 kHz, good signal, call "210", DK/GC "496 496 53 53", ended after 0513 UTC.
0600 UTC, 16115 kHz, second sending, also a good signal, slight interference from a rapidly swept carrier.

6-Aug-21, Friday:- 0500 UTC, 13540 kHz, first sending of the "next day repeat", much weaker than 24 hours earlier.
0600 UTC, 16115 kHz, very weak, way down in the noise.

19-Aug-21:- Clean forgot that this was the third Thursday in this month and missed the 0500z sending and nothing heard at 0600z on 16115.

20-Aug-21, Friday:- Nothing heard at 0500 on 13450, very weak signal of some kind but unable to confirm as E06. Nothing heard at 0600 UTC on 16115.

E07

PoSW's E07 logs reflect that above:

Sunday + Wednesday Schedule, 1700 UTC Start:-

4-July-21, Sunday:- 1700 UTC, 12223 kHz, “201 201 201 1” for a full message. DK/GC “595 87” x 2, strong signal, ended after 1711 UTC.
1720 UTC, 11023kHz, weaker, around a “6” on the S-meter.
1740 UTC, 10123 kHz, also S6.

7-July-21, Wednesday:- 1700 UTC, 12223 kHz, “201 201 201 000”, strong.
1720 UTC, 11023 kHz, weaker.

11-July-21, Sunday:- 1700 UTC, 12223 kHz, “201 201 201 000”, S9.
1720 UTC, 11023 kHz, S5 to S6.

18-July-21, Sunday:- 1700 UTC, 12223 kHz, “201 201 201 1”, full message, DK/GC “5790 66” x 2, strong, well over S9.
1720 UTC, 11023 kHz, S7.
1740 UTC, 10123 kHz, also S7.

21-July-21, Wednesday:- 1700 UTC, 12223 kHz, “201 201 201 000”, S8.
1720 UTC, 11023 kHz, S4 to S5.

25-July-21, Sunday:- 1700 UTC, 12223 kHz, “201 201 201 000”, over S9.
1720 UTC, 11023 kHz, S6 to S7.

28-July-21, Wednesday:- 1700 UTC, 12223 kHz, full message again, “201 201 201 1”, DK/GC “665 71” x 2, strong signal, peaking over S9.
1720 UTC, 11023 kHz, weaker, S6 to S7.
1740 UTC, 10123 kHz, back up to S9

1-Aug-21, Sunday:- 1700 UTC, 13397 kHz, “316 316 316 1” for a “full message”, DK/GC
“665 71” x 2. Strong S9 signal.
1720 UTC, 12197 kHz, S7 to S8.
1740 UTC, 10697 kHz, the weakest sending of the three, S5.

8-Aug-21, Sunday:- 1700 UTC, 13397 kHz, “316 316 316 000”, peaking over S9.
1720 UTC, 12197 kHz, also over S9.

11-Aug-21, Wednesday:- 1700 UTC, 13397 kHz, “316 316 316 1” for a full message, DK/GC “1839 66” x 2, good signal.
1720 UTC, 12197 kHz, strong, over S9.
1740 UTC, 10697 kHz, much weaker.

15-Aug-21, Sunday:- 1700 UTC, 13397 kHz “316” and “1839 66” again, S7 to S8.
1720 UTC, 12107 kHz, S9.
1740 UTC, 10697 kHz, weak.

18-Aug-21, Wednesday:- 1700 UTC, 13397 kHz, still “1839 66”, strong signal.
1720 UTC, 12197 kHz. Strong.
1740 UTC, 10697 kHz, much weaker.

22-Aug-21, Sunday:- 1700 UTC, 13397 kHz, “1839 66” yet again, the message can't have got through. Strong signal.
1720 UTC, 12197 kHz, strong, peaking well over S9.
1740 UTC, weak, only just readable.

25-Aug-21, Wednesday:- 1700 UTC, 13397 kHz, “316 316 316 000”, back in the old routine,
strong signal.
1720 UTC, 12197 kHz, also strong.

Saturday Schedule, 1300 UTC Start:-
3-July-21:- 1300 UTC, 12176 kHz, “152 152 152 000”, S8 signal.
1320 UTC, 11576 kHz, also S8.

10-July-21:- 1300 UTC, 12176 kHz, S9 and 1320 UTC, 11576 kHz, slightly weaker, “152 152 152 000”.

24-July-21:- 1300 UTC, 12176 kHz, “152 152 152 000”, S8 with QSB.
1320 UTC, 11576 kHz, S6.

31-July-21:- 1300 UTC, 12176 kHz, “152 152 152 000”, S8 to S9.
1320 UTC, 11576 kHz, S7 with deep QSB.

7-Aug-21:- 1300 UTC, 12176 kHz, “152 152 152 000”, S9.
Missed 1320z sending.

14-Aug-21:- 1300 UTC, 12176 kHz, peaking S9 and 1320 UTC, 11576 kHz, weaker, “152 152 152 000”.

21-Aug-21:- 1300 UTC, 12176 kHz, S9, “152 152 152 000”.
1320 UTC, 11576 kHz, S7.

Sunday Schedule, 0600 UTC Start:-

4-July-21:- 0600 UTC, 10317 kHz, “312 312 312 000”, weak signal.
0620 UTC, 11117 kHz, stronger.

11-July-21:- 0600 UTC, 10317 kHz, S5 to S6 and 0620 UTC, 11117 kHz, S8, “312 312 312 000”.

18-July-21:- 0600 UTC, 10317 kHz, “312 312 312 000”, S7.
0620 UTC, 11117 kHz, also S7.

1-Aug-21:- 0600 UTC, 9261 kHz, “224 224 224 000”, S7.
0620 UTC, 10261 kHz, weaker.

8-Aug-21:- 0600 UTC, 9261 kHz and 0620 UTC, 10261 kHz, both strong, “224 224 224 000”.

15-Aug-21:- 0600 UTC, 9261 kHz, “224 224 224 000”, strong signal.
0620 UTC, 10261 kHz, also strong.

E07a

The three E07a schedules which are best received in the UK were all in “no message” mode throughout May and June but the Wednesday evening 2000z start appeared with a message on the very last day of June. Full message from the Friday and Saturday schedules at the start of July but nothing to get excited about for the rest of that month and in August. [PoSW]

Wednesday Schedule, 2000 UTC Start:-

30-June-21:- 2004 UTC, 12166 kHz, in progress with a “full message”, surprisingly, expected it to be “000” as has been the case for the past several weeks in which case it would have ended shortly after 2002z. Very strong signal, ended just before 2006.
2020 UTC, 10766 kHz, second sending, “172 172 172 1 60704”, DK/GC “653 38” x 2. Very strong.
2040 UTC, 9266 kHz, third sending, also very strong.

7-July-21:- 2000 UTC, 12166 kHz, “172 172 172 000”, back in the old routine, very strong.
2020 UTC, 10766 kHz, also very strong.

14-July-21:- 2000 UTC, 12166 kHz and 2020 UTC, 10766 kHz, slightly weaker, “172 172 172 000”.

21-July-21:- 2000 UTC, 12166 kHz, “172 172 172 000”, strong but not the usual S9+.
2020 UTC, 10766 kHz, stronger.

28-July-21:- 2000 UTC, 12166 kHz and 2020 UTC, 10766 kHz, both very strong, “172 172 172 000”.

4-Aug-21:- 2000 UTC, 12166 kHz, “172 172 172 000”, very strong signal.
2020 UTC, 10766 kHz, also very strong.

11-Aug-21:- 2000 UTC, 12166 kHz, “172 172 172 000”, strong but not the usual rock-crusher of a signal.
2020 UTC, 10766 kHz, stronger, S9+.

18-Aug-21:- 2000 UTC, 12166 kHz and 2020 UTC, 10766 kHz, both very strong, “172 172 172 000”.

25-Aug-21:- 2000 UTC, 12166 kHz, “172 172 172 000”, very strong.
2020 UTC, 10766 kHz, also very strong.

Friday Schedule, 1510 UTC Start:-

2-July-21:- 1510 UTC, 12213 kHz, “241 241 241 1 67673”, “full message”, DK/GC “7466 54” x 2, good signal, S8.
1530 UTC, 11413 kHz, S5 to S6.
1550 UTC, 10113 kHz, weak.

9-July-21:- 1510 UTC, 12213 kHz, “241 241 241 000”, S7.
1530 UTC, 11413 kHz, peaking S7 with QSB.

16-July-21:- 1510 UTC, 12213 kHz, S8 to S9 and 1530 UTC, 11413 kHz, weaker, “241 241 241 000”.

23-July-21:- 1510 UTC, 12213 kHz, “241 241 241 000”, S8.
1530 UTC, 11413 kHz, S6 to S7.

30-July-21:- 1510 UTC, 12213 kHz, “241 241 241 000”, interference from very strong buzz/pulse type signal extending from approx 12190 to 12220 kHz.
1530 UTC, 11413 kHz, S7 to S8.

6-Aug-21:- 1510 UTC, 12213 kHz, S8 and 1530 UTC, 11413 kHz, S6 to S7, “241 241 241 000”.

13-Aug-21:- 1510 UTC, 12213 kHz, “241 241 241 000”, S7 to S8.
1530 UTC, 11413 kHz, weaker.

20-Aug-21:- 1510 UTC, 12213 kHz, S7 to S8 and 1530 UTC, 11413 kHz, weaker, “241 241 241 000”.

27-Aug-21:- 1510 UTC, 12213 kHz, “241 241 241 000”, S7.
1530 UTC, 11413 kHz, weak, difficult copy.

Saturday Schedule, 0800 UTC Start:-

3-July-21:- 0800 UTC, 12173 kHz, “198 198 198 1 67373”, DK/GC “7466 54” x 2, as expected a repeat of the message heard on yesterday's 1510z schedule. Weak signal at first, became stronger.
0820 UTC, 13973 kHz, S5 to S6.

0840 UTC, 14873 kHz, interference from one of those wide-band buzz/pulse signals, someone's over-the-horizon radar, perhaps.

10-July-21:- 0800 UTC, 12173 kHz and 0820 UTC, 13973 kHz, both around S7, “198 198 198 000”.

17-July-21:- 0800 UTC, 12173 kHz, “198 198 198 000”, S7 to S8.
0820 UTC, 13973 kHz, weaker.

31-July-21:- 0800 UTC, 12173 kHz, S7 to S8 and 0820 UTC, 13973 kHz, S4 to S5, “198 198 198 000”.

14-Aug-21:- 0800 UTC, 12177 kHz, “148 148 148 000”, S6 to S7.
0820 UTC, 13477 kHz, weaker, interference from a rapidly swept carrier.

21-Aug-21:- 0800 UTC, 12177 kHz, strong signal, “148 148 148 000”.
0820 UTC, 13477 kHz, weaker and with sweeping carrier interference.

S06 & S06s RUSSIAN from PoSW**S06, OM Voice:-****First + Third Fridays in the Month Schedule, 2000 + 2100 UTC in July, 1900 + 2000 UTC in August:-**

2-July-21:- 2000 UTC, 9475 kHz, "768 768 768 00000", S8 to S9.
2100 UTC, 7561 kHz, peaking over S9.

16-July-21:- 2000 UTC, 9475 kHz, strong, "768 768 768 00000".
2100 UTC, 7561 kHz, weaker.

6-Aug-21:- 1900 UTC, 9475 kHz, "768 768 768 00000", weak, interference from a strong broadcast station on 9480, probably would not have been a problem if S06 had stayed at 2000z as in July.
2000 UTC, 7561 kHz, much stronger, peaking over S9 with rapid up and down fading.

20-Aug-21:- Nothing heard at 1900 UTC on 9475, must have been a very weak signal although broadcast stations on neighbouring frequencies were strong enough.
2000 UTC, 7561 kHz, very weak signal, only just readable, "768 768 768 00000".

S06s, YL Voice:-

Monday 0900 + 0910 UTC Schedule, call "232":-

12-July-21:- 0900 UTC, 16380 kHz, DK/GC "480 480 5 5", S6 to S7, "26634 14690 95590 60386 03009".
0910 UTC, 14835 kHz, S6 with QSB.

19-July-21:- 0900 UTC, 16380 kHz, DK/GC "984 984 5 5", "52343 69628 42432 56075 65281", weak at first then became stronger.
0910 UTC, 14835 kHz, weak signal of some kind, way down in the noise, unable to confirm as the second sending.

23-Aug-21:- 0900 UTC, 16380 kHz, weak signal, sank into noise, second sending better:-
0910 UTC, 14835 kHz, DK/GC "846 846 5 5", "33696 13577 74526 46647 79302".

Tuesday 0730 + 0740 UTC Schedule, Call "427":-

13-July-21:- 0730 UTC, 7365 kHz, DK/GC "913 913 5 5", S6 with QSB, "88146 57856 98835 46186 16945".
0740 UTC, 11655 kHz, strong signal, a good S9.

3-Aug-21:- 0730 UTC, 7365 kHz, weak signal, sank into noise.
0740 UTC, 11655 kHz, much stronger, DK/GC "918 918 5 5", "88146 57856 98835 46186 16945".

17-Aug-21:- 0730 UTC, 7365 kHz, very weak, unreadable.
0740 UTC, 11655 kHz, stronger although only S5 at best, DK/GC "935 935 6 6", "61881 60151 56499 37086 11887 44066".

24-Aug-21:- 0730 UTC, 7365 kHz, unlike last time this was a strong signal, S9 with QSB, DK/GC "935 935 6 6" and 5Fs as on the 17th.
0740 UTC, 11655 kHz, very strong, S9+.

Wednesday 1000 + 1010 UTC Schedule, Call "276":-

7-July-21:- 1000 UTC, 14580 kHz, DK/GC "431 431 5 5", S5 with QSB, "77821 14869 62733 77538 48223".
1010 UTC, 16020 kHz, also around S6.

14-July-21:- 1000 UTC, 14580 kHz, "431 431 5 5" and 5Fs as on the 7th. Weak signal.
1010 UTC, 16020 kHz, weak, difficult copy.

28-July-21:- 1000 UTC, 14580 kHz, DK/GC "489 489 5 5", good signal, peaking around S8 with QSB, "43247 43380 48080 36478 38013".
1010 UTC, 16020 kHz, weaker.

11-Aug-21:- 1000 UTC, 14580 kHz, DK/GC "980 980 5 5", "42997 84116 53718 78927 34694", S7 with QSB.
1010 UTC, 16020 kHz, a couple of S-points weaker.

25-Aug-21:- 1000 UTC, 14580 kHz, DK/GC "438 438 5 5", S6 to S7, "61882 70252 56388
26088 89206".
1010 UTC, 16020 kHz, weak, started off at around S4, rapidly sank into noise and became unreadable.

Friday 0830 UTC + 0840 UTC Schedule, Call "156":-

23-July-21:- 0830 UTC, 10290 kHz, DK/GC "834 834 7 7", good signal, "23013 89758 52343 79628 42432 56075 56281".
0840 UTC, 9655 kHz, strong.

20 Aug-21:- 0830 UTC, 10290 kHz, DK/GC "824 824 7 7", strong signal, S9, unusual because for the past couple of Fridays this schedule has been too weak to copy on both transmissions. "44817 89106 37937 16393 56723 71382 94742".
0840 UTC, 9655 kHz, also strong.

27-Aug-21:- In contrast with last week's transmissions nothing audible on either 10290 or 9655 this morning.

First Saturday in the Month 0800 + 0810 UTC Schedule, Call "132":-

3-July-21:- 0800 UTC, 12460 kHz, DK/GC "804 804 5 5", S7 with QSB, "68734 24316 57684 79734 23412".
0810 UTC, 10250 kHz, very weak, difficult copy.

Driver, 64, is jailed for eight months after police caught him using laser jammer on his S-class Mercedes to beat speed traps

Keith John, from Swansea, was jailed for eight months after using laser jammers. Laser jammers send bright flashes towards speed cameras to stop them working. John, 64, fitted two jammers but claimed he was using them as parking sensors. After his trial in May, the jury found him guilty of perverting the course of justice.

<https://www.dailymail.co.uk/news/article-9836223/Driver-64-jailed-eight-months-police-caught-using-laser-jammer-beat-speed-traps.html>

A driver has been jailed after he fitted a laser jammer to his car, which confused a speed camera and stopped it from working.

Keith John, 64, from Ynysforgan, Swansea, was jailed for eight months for perverting the court of justice after he fitted two laser jammers to the front of his car to beat speed traps.

He claimed he was using them as parking sensors and had not been breaking the speed limit when his use of the jammers came to light, but an engineer slammed use of the devices as a 'deliberate scam'.

Laser jammers send bright flashes of infrared light towards a speed camera device, making it impossible for the camera to work adequately and take an accurate reading or measurement of the speed a car is being driven at.

His use of the devices was discovered when a casualty reduction officer at Go Safe Cymru was operating a speed camera on the A40 in Llanspyddid, near Brecon.

The officer noticed that although he could pick up the speed at which the cars immediately before and after the silver Mercedes were travelling, he could not pick up the speed of that one vehicle.

Recognising that the error message on his device was not normal, the incident was reported and upon investigation, police found two black rectangular objects fitted to the front of the car, one on each side of the number plate.

The devices were confirmed to be laser jammers and PC White and PC Jones of Dyfed-Powys Police went to John's home and found two further vehicles fitted with the same devices.

The two vehicles, the Mercedes, and an additional two cars registered to the property were seized and examined by Steve Callaghan, a forensic engineer at Road Safety Support.

He discovered six laser jammer systems in total across the five vehicles. One of them, a Vauxhall van, had two separate laser jamming systems and a radar and laser warning device fitted to it.

John was charged with perverting the course of justice following the incident on May 19, 2018. He pleaded not guilty, and his trial was not held until May this year.

He told Merthyr Tydfil Crown Court that the laser jammer was actually a parking sensor and that he hadn't broken the speed limit of 60mph, so he had no need to use the jamming system.

But Mr Callaghan argued that the jammers are 'all but useless' as parking sensors and insisted that it was a 'deliberate scam'.

He continued: 'While Mr John, as others have done before him, contended that the blinder jammer can function as a parking sensor, this is a deliberate scam to attempt to confuse the police and courts.'

What is a speed camera jammer and how does it work?

Laser jammers are devices that can block speed camera signals used to detect how fast cars are going.

Speed cameras function by flashing an invisible light at oncoming cars to measure their speed.

Jammers operate by sending out a laser signal of a similar frequency, which effectively cancels out the camera's one.

This creates an error message and fails to capture the speed of the car.

They can usually only outsmart moving cameras as static ones use the traditional formula of speed over distance by taking multiple pictures of the vehicle.

While laser jammers are legal to buy and sell to use as parking sensors or garage door openers, it is not legal to trick a speed camera.

Their use comes under laws against perverting the course of justice, which can carry custodial sentences and/or fines.

In 2018, company director Timothy Hill, 67, attached a jammer device to his Range Rover and raised his middle finger as he drove past speed cameras.

Hill claimed he had not been driving the vehicle but pictures showed him from behind the wheel of the car.

He was later jailed for eight months for perverting the course of justice.

'Mr John's S-class Mercedes, one of the most well-equipped and luxurious cars by reputation and quality, needed no additional device to supplement the excellent parking aids on his car.'

'The blinder jammer is primarily a device used to trick the police into thinking their equipment is defective while the driver using it can speed with impunity.'

'In any case it should be recognised that laser jamming devices are all but useless as a parking sensor.'

At the end of the trial, which took place between May 18 and May 21, the jury found him guilty of perverting the course of justice and he was jailed for eight months.

Dyfed-Powys Police inspector Andrew Williams said: 'I would like to thank all involved for their efforts in putting together a strong file of evidence, and overcoming a number of difficulties during the investigation - not least the defendant's reluctance to provide any information in interview.'

'Speed cameras - both fixed and mobile - are there not to frustrate drivers, but for the safety of all road users.'

'By installing devices like this to evade being caught driving at excess speed, John showed a blatant disregard for the law, putting himself and others at risk.'

Sergeant Ian Price, GoSafe coordinator at Dyfed-Powys Police, said John's punishment was far greater than what he would have got had he just been caught speeding.

'The offence of speeding in these circumstances would have ordinarily caused a driver to have their driving licence endorsed and a fine of £100 or an educational speed awareness course,' he said.

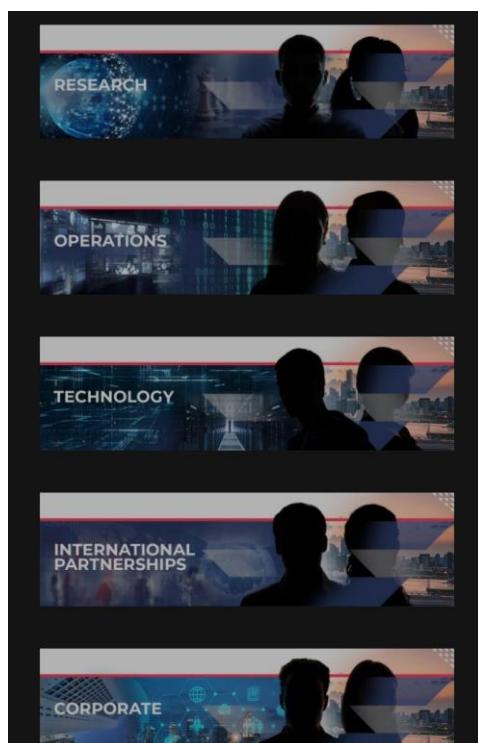

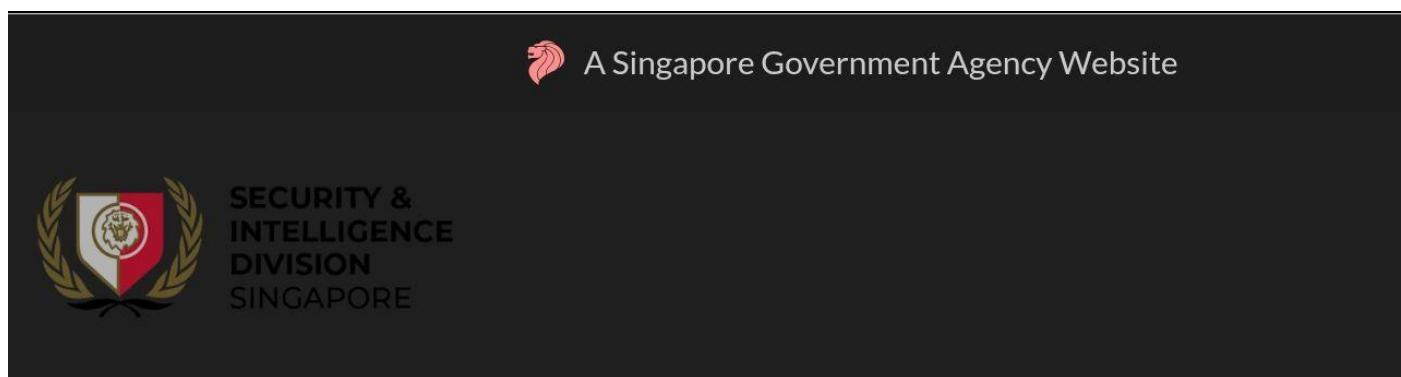

'However, when people go to extreme lengths to avoid prosecution in fitting technology to their car that allows them to exceed the speed limit without fear of prosecution, they not only show an insalubrious attitude towards the judicial system of this country and what it stands for, they also display a complete disdain towards the risk of harm to others where excessive or inappropriate speed are one of the primary causes of killed or serious injury collisions in the UK.'

'The sentence handed out is a lesson to those in society who feel they can cheat the law and pose a real and substantial risk of harm on our roads'.

Teresa Ciano, GoSafe partnership manager added: 'Speeding is a choice, fitting a laser jammer is a choice; a choice which Mr John made to the detriment of safety of all other road users.'

PoSW's Items of Interest in the Media:-

Items of Interest in the Media:-

Still trying to avoid the mainstream media as much as possible, even BBC Radio 4 which used to be my favourite listening but has now been taken over by the politically correct brigade with the constant trashing of our history and the never-ending grievance culture worked into almost every programme. If you are white, male and of a slightly right of centre persuasion then you can be expected to be blamed for all of the world's ills. The only BBC radio I listen to now is Radio 4 Extra which has a lot of vintage comedy in its listings from forty or fifty years ago when comedy was funny and actually made people laugh; shows like *I'm Sorry I'll Read That Again*, *Round the Horne* and *The Goon Show*, this last example an early vehicle for the late, great Peter Sellers before he became internationally famous in the *Pink Panther* films and others. Even here the "woke" crowd have to stick their oar in, so to speak. Before the programme starts the hushed voice of the continuity announcer will say something like, "We would like to point out that this show dates from 1957" - or whenever "and contains outdated language and attitudes". When you listen carefully to what the offensive content might be it is difficult to determine what the point of it is - except that Mr Sellers and his sidekick Spike Milligan often play the parts of comedy characters with Indian names and speak in the accent of folks from that part of the world - based on their own personal experiences no doubt since Spike was born there and Mr Sellers was stationed there in the forces.

At the time of writing in the last days of August the big story on the news websites is the exit of the United States forces from Afghanistan with much reporting of the huge amounts of military equipment the Americans have left behind, everything from hand-guns, assault rifles, machine guns, weapons of all kinds, large numbers of aircraft both fixed-wing and helicopters, vehicles of all kinds including large numbers of those Humvee off-road trucks and large quantities of radio communications equipment. The comparison has been made with the vast amount of equipment the British left behind in France at the time of the evacuation of Dunkirk in 1940. All of this is now in the hands of the Taliban although whether they will be able to keep the high-tech stuff working for long is another matter.

There is much speculation that examples of these weapons will have been sold on to the Chinese and Iranians who will no doubt be able to incorporate the finer details in their own weapons designs which will almost certainly be used against American soldiers when they are sent to fight in the next country on Uncle Sam's regime change list.

In keeping with the general principle of avoiding the mainstream media I have bought very few newspapers in the last couple of months. However, *The Times* of 6-August contained a couple of stories on the world news pages which although not connected with espionage as such have much to tell about the state of the world.

The first carries the headline, "Nearly half of Russians want a Stalin statue", written by Matthew Luxmmore in Moscow which goes on to say, "Almost half of Russians want a state-sanctioned monument to Joseph Stalin, according to an independent poll that shows the figure has nearly doubled in ten years."

The Levada Centre said 48 per cent of respondents would be 'positively disposed' to the idea of a statue to the Soviet despot to celebrate victory over the Nazis. Only 20 per cent firmly opposed the idea, and 29 per cent said they were 'indifferent'. A decade ago only 25 per cent backed a statue.

Approval of Stalin's legacy has grown under President Putin, who has made celebration of winning the 'Great Patriotic War' a pillar of his rule. Monuments to the dictator were erected en masse during his 28 years in power, but many were dismantled after Nikita Khrushchev took power. Recently the changing public mood has led to the building of a number of Stalin statues, mostly on private land."

The second brief item should, I guess, fall into the "Wars and rumours of wars" category.

"Indian-made aircraft carrier in sea trials" is the headline over a short paragraph from the AFP agency which says, "India – Delhi conducted sea trials of its first domestically built aircraft carrier and dispatched a task force for joint exercises with the United States and other allies in the South China Sea. The INS Vikrant will be India's second aircraft carrier, joining INS Vikramaditya, which was bought from Russia in 2004. The navy is pressing for a third carrier to counter Chinese influence."

Point to ponder:- "No one can terrorise a whole nation, unless we are all his accomplices"
Ed Murrow, American broadcaster and journalist, speaking of Senator Joseph McCarthy, March 1954.

Thanks Peter

Now for something completely different!

FIRST NIGHT | OPERA

The Life and Death of Alexander Litvinenko review — worthy but dull

Grange Park Opera, West Horsley

Richard Morrison

Friday July 16 2021, 12.00pm, The Times

<https://www.thetimes.co.uk/article/the-life-and-death-of-alexander-litvinenko-review-worthy-but-dull-xd0vv6llr>

Already this summer Grange Park Opera has delved into the murky recesses of Russian history by staging Rimsky-Korsakov's Ivan the Terrible. Perhaps its new opera should have been called Putin the Terrible. Russia's president isn't actually named in the list of characters for The Life and Death of Alexander Litvinenko, but there can be little doubt that he's the villain of the piece. Either way, I don't think Bolshoi Opera will be staging the work any time soon.

As its title suggests, the two-act opera reflects on the bravery and horrific poisoning — in London in 2006 — of Litvinenko, a Russian secret service officer turned dissident whistleblower. A book co-written by his widow, Marina, provided the starting point for the opera's composer, Anthony Bolton, and the librettist, Kit Hesketh-Harvey.

What's alleged (but presented here as fact) is that Litvinenko was killed by having the deadly radioactive agent polonium-210 dropped into his tea by an old colleague, Andrei Lugovoy. That's not the only murderous episode portrayed. Using masked actors spread through the auditorium, we also sit through a jolting re-enactment of the 2002 storming of the Dubrovka Theatre in Moscow by Chechen fighters (incited by Russian agents, the opera suggests).

Another flashback takes us to the Chechen war itself, where Litvinenko apparently sees the light and resolves to denounce publicly his employers. Also featured is the oligarch Boris Berezovsky, who finances Litvinenko and his family when they are exiled in London, and the anti-Putin investigative journalist Anna Politkovskaya. Her assassination is portrayed as well.

All of which might suggest that this is an opera full of so many shocks, terrors and malign misdeeds that you leave the theatre shaking with fear and righteous indignation. So it might have been if, for instance, Shostakovich had been available to compose it.

Sadly, Bolton is no Shostakovich. Through no fault of the conductor, Stephen Barlow, the orchestration (prerecorded by the BBC Concert Orchestra) is tame to the point of nonentity, the harmonies mostly drearily atonal, and the vocal setting of Hesketh-Harvey's equally stodgy words as grey as a foggy day in Omsk.

That's a pity because a good cast — including Adrian Dwyer as Litvinenko, Rebecca Bottone as Marina and Edmund Danon as the presumed assassin Lugovoy — deserves something a lot more expressive. The pastiche Russian Orthodox chorus, stirringly hurled out, is better written, and there's a cracking tune to herald Berezovsky's birthday party. Unfortunately it was written by Tchaikovsky.

Stephen Medcalf's staging is a whirr of video projections, including much meticulously researched news footage. The whole project is undeniably worthy, but it would have worked far better as a spoken play or TV docudrama.

Beware of Chinese spies, visa applicants told

The Times 17 Aug 2021 Matt Dathan Home Affairs Editor Kaya Burgess

<https://www.thetimes.co.uk/article/beware-of-chinese-spies-visa-applicants-told-thdz6g8hq>

The government is urging Hongkongers to apply for Britain's new visa scheme online because China is stationing agents outside application centres, The Times has learnt.

Ministers have been given intelligence that undercover agents are spying on dissidents coming and going from two centres in Hong Kong.

It is feared that they are passing on names and photos of dissidents to the Chinese authorities in an attempt to block their departure. The Times revealed last week that Chinese spies were posing as dissidents in an attempt to enter Britain through its Hong Kong visa scheme.

The Home Office has put in extra background checks for the visa applications, which are "much more thorough than any other", sources said.

The UK has received more than 35,000 applications for the five-year scheme, open to British National Overseas (BNO) citizens from Hong Kong, since it opened on January 31.

The scheme was launched in response to China's security crackdown last year. Its national security law imposed stringent measures on Hongkongers, ostensibly to prevent terrorism, but it was seen by many as an attack on freedom of speech. Almost half of applications received by the end of May came from people who had already travelled to the UK.

The government is working with community groups in Hong Kong to urge those still on the island who want to apply for the visa to do so online rather than in person because of the spying fears.

While Hongkongers with certain biometric passports can carry out the whole process online, those who are unable to scan their passports with a smartphone need to attend a visa centre. However, this process is being reviewed to see if there is a way to avoid using the centres.

A Home Office spokesman said: "There are safeguards in place throughout the application process to ensure the BNO route is safe and secure for those applying. The majority of applicants will be able to apply for the BNO route via a fully digital process, eliminating the need to attend a visa application centre."

The Times has also learnt that a cross-government taskforce put in place to help Hongkongers integrate in the UK includes at least one member who belongs to an organisation that supports China's new security laws. The member, who cannot be named because the UK government keeps membership secret to avoid them facing intimidation or pressure from Beijing, has publicly supported the Chinese Communist Party.

The Hongkongers in Britain organisation has written a letter to the UK government saying that the individual's inclusion in the taskforce "contravenes the very ethos and rationale of the BNO visa scheme". It warned that the inclusion of a party supporter risked exposing "key information" to Beijing.

In response, the government has pledged to remove from the taskforce any member who is found to support China's security crackdown.

Obviously linked to the above:

MI5 warns spies of Chinese honeytraps

David Sanderson

Monday November 10 2014, 12.01am, The Times

<https://www.thetimes.co.uk/article/mi5-warns-spies-of-chinese-honeytraps-cjsbwjjvtmj>

Beware Chinese women seeking friendship, Britain's defence officials have been warned (David Sanderson writes).

A security manual detailing how to avoid honeytraps is reported to have been issued to leading members of Britain's defence establishment.

The Ministry of Defence document warned that China's attempt to cultivate "friends" is subtle and long term, adding that its intelligence agents are "expert flatterers" who are "well aware of the softening effect of food and alcohol". It said that China and Russia may attempt to blackmail officials "through knowledge of marital infidelity or sexual activity".

The document, reported in The Sunday Times, said that China did not target specific data but instead had a "vast and indiscriminate" appetite for information. "They do not 'run agents', they make friends," the article said. "Although there are Chinese intelligence officers, both civilian and military, these fade into insignificance behind the mass of students, businessmen and locally employed staff working, at least part-time, on the orders of various parts of the state intelligence-gathering apparatus." The Ministry of Defence refused to comment.

The above reminded me of that offered in En120 and my colleagues warning:

Downfall of 'double agent' revealed after 23 years

France

Charles Bremner

A French spy who fell for a Chinese interpreter in Beijing goes on trial for treason today with two others.

Henri M, 74, a former lieutenant-colonel, was the Beijing station chief for the DGSE, France's equivalent to MI6. The spy, a Mandarin speaker, is accused of passing secrets to a foreign power and "damaging the fundamental interests of the nation".

He was dismissed from the intelligence service and sent home in 1997 after only a few months for starting a relationship with JH, the female interpreter for the French ambassador.

The case is unusual because the DGSE waited two decades before beginning a prosecution, apparently in a move to "spring clean" the agency by

sending cases to the courts. Facing the same charges in the special seven-judge court is Pierre-Marie H, 68, a retired civilian officer of the DGSE.

He was allegedly recruited by Beijing when he was approaching retirement and looking for extra income. Laurence H, Pierre-Marie's wife, is accused of "concealment of property derived from intelligence with a foreign power".

Henri M, who was said to have been a go-between, was serving in a diplomatic post with second secretary rank.

The Chinese would have known his true role when he was snared by J H.

She is believed to have been working for the Ministry of State Security, China's most powerful intelligence agency. Colleagues told the French media that he was sent to Beijing without his wife and had been feeling lonely.

After leaving the agency Henri M returned to China in 2003, where he married the interpreter. The couple set up HM Ch'na, a British-registered business, and lived on Hainan Island, off the southern coast of China.

The story was reported by Franck Renaud, an investigative writer, in a 2010 book. A person claiming to be Henri M then surfaced online to deny that he had defected and insists that he had faced no legal action.

In 2017 he was arrested in France by officers of the DGSI, the domestic security service, which also went after Pierre—Marie H, who had kept a low profile, unlike his compatriot.

He is reported to have spent his career in modest posts, starting in counter-espionage and ending in Dijon after irritating his superiors with conspiracy theories about Freemasons and communists. He was arrested at Zurich airport after arriving from Sri Lanka carrying more than €25,000 in cash.

No details have been officially confirmed. Florence Parly, the defence minister, said after the arrests in 2018 that the pair were suspected of treason and appeared to have jeopardised national interests.

A former colleague of the men told Marianne, a weekly news magazine; "My theory is that Henri M betrayed out of love and began working with the Chinese. He would appear to have served as liaison agent with Pierre—Marie H and his import-export business justified his travels."

Lawyers for the two men are expected to ask for the case to be dismissed.

Henri M has been free on bail for a year but Pierre-Marie H has been held in Fleury—Mérogis prison near Paris. If convicted, they face long prison terms. [Thanks 'E']

Ed: This piece from 'E' took a long time to OCR and convert. It is interesting because I too was apparently targeted by a Chinese lady of some assumed social standing.

On my way to a book release and signing [House of Spies by Peter Matthews] at St Ermin's Hotel on 3rd November 2016 I was approached and spoken to by the lady who introduced herself as Chi. Well dressed, wearing beautiful clothes and excellent perfume, well spoken, she engaged me in conversation for almost 40 minutes. What was my spare time interest, my occupation and so on? Was I happily married? It just went on. What was interesting was the lady had sat next to me when there were plenty of free seats available elsewhere. She also made sure her left leg, she was on my right, occasionally moved against my right leg.

It was interesting she moved to my right because since my neurosurgery years ago my right ear is more acute for conversation.

The lady stated she was not married but preferred the company of professional married men. She liked dining out but when I asked her profession she hedged the question and quickly moved on, complimenting me on my dress sense, 'Sports Jacket, white shirt, Royal Signals tie, Cavalry brown slacks and shiny brown shoes.'

Surprised she knew about the Royal Signals to be honest.

Could she have my address and telephone number? No she could not!. It's a pity she said, really interested in what I do in my spare time. Very touchy feely, could we meet at a date and place we could set now. Sorry, best not.

It wasn't until a month or so later I was having lunch with a contact I mentioned this and he said it was almost certainly a pick up. What might have happened? Who knows but the lady was very attractive for her age [estimated as 45 to 50] and on reflection my arrival and alighting from the train at the Underground Station at St James' saved my bacon! This is not wishful thinking but something that occurred a few years back and for someone who has a penchant for Asian ladies was very, very tempting. [*This part takes the reader straight back to the Honeytrap Warning*]

SPECIAL MATTERS

Thanks to all our contributors:

Ary, BR, DanAr, Dannix, , E, HH, HJH, JkC, Jochen, KW, Malc, MaleAnon, , PoSW, PLdn, RNGB, SloRoll, tING, XAH
Apologies to anyone missed.

MESSAGES:

E: Thanks for valid input. The noise you refer to is just about everywhere. Conditions are generally bad with the odd lift, enjoy what's left.
