Propagation is well up for the upper HF Bands for the last couple of months with solar activity such that allegedly the Northern Lights have been seen in the Midland and on 26/02, Cornwall. A mate of mine, 14 years older than me, said he'd seen them in North London but to be honest I had to question whether he had been crushing up his BP pills, Water tablets, Statins and Tramadol and taking them up his nose. But, good propagation is still in the offing it seems for this, Cycle 25. On 24/03 indeces were A60 K6 HF predictions fm 80 to 10M were poor and notably the usually strong XPA2 Wed/Fri schedule was much reduced to weak/NRH. Posting the 1500z E07 Tues/Fri schedule heard by M8 via Dutch SDR [NRH with PLdn] Malc noted:: A severe magnetic storm hit the earth March 23-24 the most intense for almost 6 years Good time to see the Northern Lights.... Very poor conditions on the H/F.

Mind you, on 24<sup>th</sup> April the solar predictions were very poor; my following of the NRC at Bletchley Park indicated problems but the values seen on respective sites indicated why: SFI 135, SN 77, A66 K6 meant poor propagation from 80 to 10M

The usual number stations are being heard although we're not seeing reports on the Cuban stuff. Anybody?

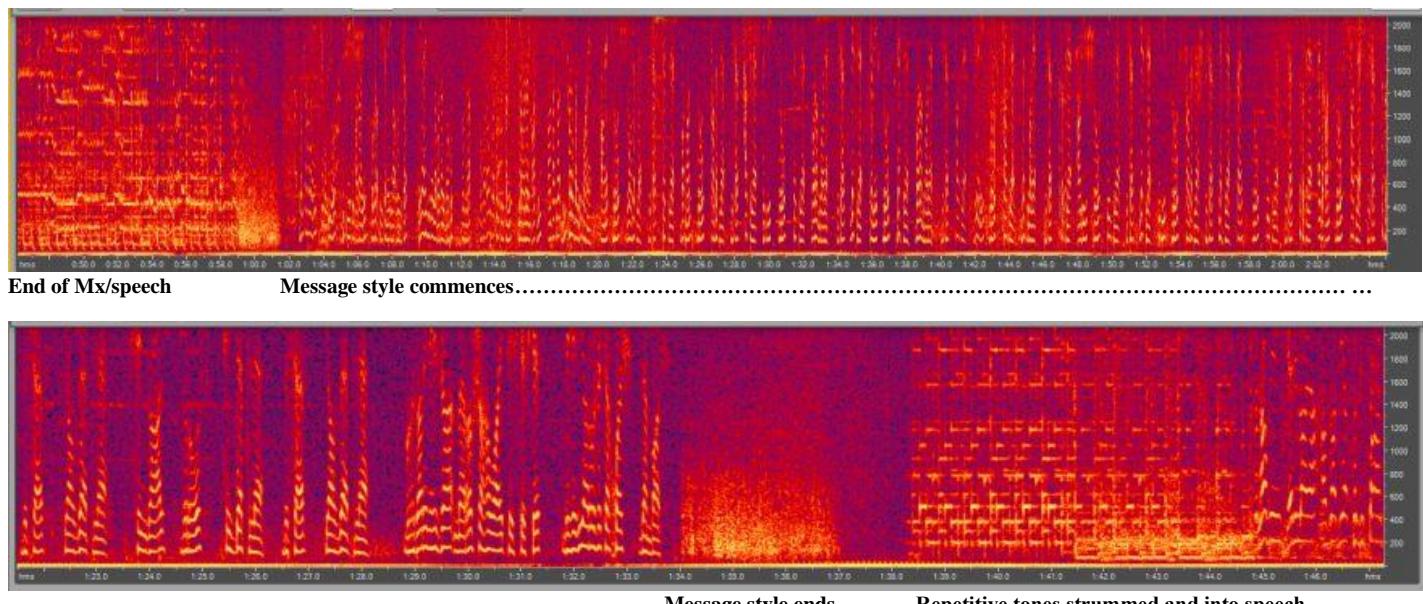

Whilst listening for E07 Tue/Fri 1500z schedule an UNID on 17460kHz was discovered as it splattered into the E07 118grp message. It was thought to be Slavic mx + what sounded as numerals[?] unknown language. The station was identified by Ary as Radio Denge-Welat that serves Kurdistan. Listening to the content it sounds most patriotic. The language used is Kurmanji, Radyo denge-welat translates to 'Country Radio.'

However during the 1540z serving of E07 I adjusted frequency when I noticed the mx and speech had changed to what sounded like message groups. Looking into the Kurdish offerings for numerals I was surprised to see in one form the written style followed the expected written Arabic form. Not so lucky with the pronunciation though:

0 - Sifer 1 – yek 2 – du 3 – sê 4 – çar 5 – pênc 6 – şes 7 – heft 8 – heş 9 – neh 10 – deh

It seems this station, as Ary states, is sometimes jammed by Turkey – there is mention of this on the net too. It appears there are a number of frequencies it has used, apparently transmitted from France: 11530, 11540, 15175 and 17460kHz.

The Mx heard was a sort of balalaika form. A sudden change of content brought a message form style as can be seen here:

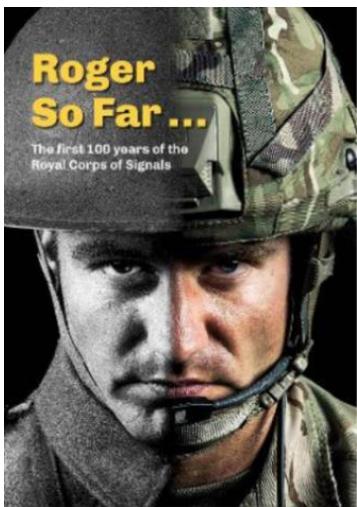

Radio Denge-Welat has a website: <http://www.denge-welat.org/> which does not easily convert to English. I'll be taking my recordings down to my local 'Turks' where I used to meet MalcF for our nefarious number stuff or perhaps the nearby Kebab shop for a quick translation. [Recordings available E2k grp site]. Msg heard next day also and lasted 1550z to 1554z.

It's worth noting that in the past certain BC Stations have carried messages in a variety of forms; New Star springs to mind but so does Radio Moscow where the opening few bars transmitted on one particular freq and day of week/particular month instructed their 'agent' to clear a certain DLB. One such person was ex-DS John Symonds who fled Britain as Op Countryman closed in on him. Given Turkish jamming perhaps this message content is important to someone, somewhere.

The next day 22/03 I tuned up on 17460kHz to find it still sending and at reasonable signal strength as well. No message format as yet but who knows?

I had seen this book around Christmas but at £30 decided against purchase. A recent drive to sell at £8.50 from Royal Sigs Museum shop prompted me to buy. It's a spiffing book with detail about stuff I had once used. In addition there's sections on Crypto methods and usage.

Then there's a section on certain places I have been as well as at least three other members. It's a good buy at the reduced price.

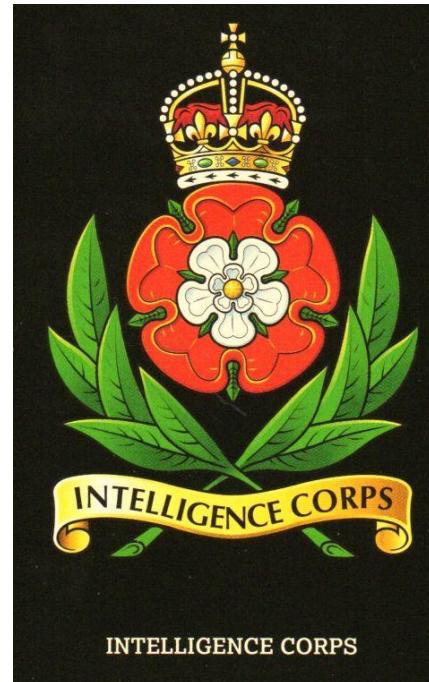

The official centenary book for the Corps of Royal Signals. Communications have always been, and are still a vital part of the Army's fighting power. Only with clear and trusted communications can commanders support, control, and lead their units and soldiers.

The evolution of electrical communications in the last 150 years has been one of the most important developments humanity has ever witnessed. As the advantages that from ever more complex equipment became apparent the need for a technical arm of the Army, who specialised in communication systems, became apparent.

The Royal Corps of Signals was founded in 1920 and since its founding the Corps has been leading the development of communications; delivering them in a variety of operational theatres.

**AUTHOR:** The Royal Signals are the Army's professional communicators. Everywhere the Army deploys from Special Forces and intelligence gathering teams to personnel deployed in armoured vehicles the Royals Signals deploy. The Corps celebrates its centenary in 2020. 400 colour illustrations.

Publisher T.H.E. Hi-Story Press LTD ISBN-13 9780750990509

## Australia

### Fake Russian diplomats revealed as heart of ‘hive’ spy ring in Australia

By Nick McKenzie

February 24, 2023 — 5.50am

<https://www.smh.com.au/national/fake-russian-diplomats-revealed-as-heart-of-hive-spy-ring-in-australia-20230223-p5cmxz.html>?

ASIO director-general Mike Burgess described the spying operation in a major speech in Canberra on Tuesday, but did not name Russia. The spy ring’s aim was to recruit Australians with access to classified information and, according to one source, use sophisticated technology to steal data and communicate without being intercepted. The decision to let Russian diplomats remain in Australia as the war escalated in Ukraine allowed for ongoing efforts to monitor the spy ring members. Members of the spy ring were quietly forced out of Australia over the past six months with their visas not renewed or cancelled. A highly active “hive” of Russian spies posing as diplomats operated in Australia for more than 18 months before it was dismantled as part of a sweeping and aggressive counter-espionage offensive by ASIO.

The Australian intelligence agency spent months tracking the Russian spy ring, which comprised purported embassy and consular staff and operatives using other deep cover identities, before ASIO finally moved to force the ring’s key players out of Australia, according to sources with knowledge of its operation.

Foreign interference at all-time high, ASIO boss says

ASIO director-general Mike Burgess has said Australia is experiencing its highest level of foreign interference and espionage in our history.

ASIO director-general Mike Burgess described the spying operation in a major speech he delivered in Canberra on Tuesday, but did not name Russia.

Sources confirmed ASIO had uncovered the spy ring operating out of a number of locations, including the Russian embassy in Canberra, while the Morrison government was in power.

The spy ring’s aim was to recruit Australians with access to classified information and, according to one source with knowledge of the Russians’ activity, use sophisticated technology to steal data and communicate without being intercepted.

Rather than press for the expulsion of Russian embassy staff after President Vladimir Putin’s invasion of Ukraine — a move that occurred in other Western nations and which was sought by some within Australia’s intelligence community and Labor in early 2022— ASIO instead conducted a clandestine counter-espionage probe.

It tracked the Russian spy ring, ensuring targets did not suspect they were being watched by ASIO.

The sources said one factor influencing ASIO’s decision-making throughout the operation was the possibility Russia might retaliate by targeting the small number of Australian diplomatic staff in Moscow.

Some intelligence operations have previously led to tit-for-tat reprisals. One source with knowledge of the Russian spy ring said that if undeclared spies were aggressively and publicly expelled, there was an increased likelihood diplomats or other Australians living in Russia would have been targeted.

An early indicator of the Russian spying operation was the relatively high number of diplomatic staff it maintained in Australia given the extent of bi-lateral relations, especially when compared to the small number of staff maintained by Canberra in Moscow.

Intensive ASIO investigations had revealed several of Moscow’s diplomatic staff in Australia were involved in the spy ring, the sources said.

The abuse of diplomatic status to conduct espionage, while common in the intelligence world, represents a serious breach of protocol on the rare occasions it is exposed.

The revelations about the scale and seriousness of the breaches in Australia will inflame already strained relations between Moscow and Canberra.

In early 2022, then-opposition leader Anthony Albanese and then-shadow foreign affairs minister Penny Wong called on the Morrison government to expel Russian diplomats in light of reported atrocities in Ukraine.

“It is hard to conceive how the decision can be made to allow these individuals to stay, given the sickening abuses being carried out by Russian forces,” the pair said in a joint statement.

At that time, the ASIO operation was in full flight and there was division within the intelligence community about the impact of any aggressive, large-scale deportation move.

In response to Labor’s deportation call in April, then-foreign minister Marise Payne — a member of the National Security Committee that has access to ASIO intelligence — said such a move was “under review … at the highest levels of the government”.

The sources said the decision to let Russian diplomats remain in Australia allowed for ongoing efforts to monitor the spy ring members. Then members of the ring were quietly forced out of Australia over the past six months with their visas not renewed or cancelled.

ASIO Director-General Mike Burgess says the level of foreign interference and espionage targeted at Australians is at its highest ever level. National security

‘It feels like hand-to-hand combat’: ASIO boss warns on spy hives, foreign interference

In November, as the Ukraine-Russia conflict became entrenched, Wong released a statement stressing that “all options remain under consideration” in connection to the high number of Russian diplomats in Australia.

“While our preference is to maintain diplomatic channels, diplomatic profiles must always be consistent with our national interest,” a spokesperson for Wong said in the statement.

“The Australian government is looking hard at Russia’s diplomatic profile in Australia.”

That same month, at a Senate estimates hearing, Liberal senator James Paterson queried Labor and federal bureaucrats about the presence of Russian diplomats in Australia.

The Russian embassy was contacted by phone and email on Thursday but provided no response.

A spokesperson for Home Affairs Minister Clare O’Neil declined to comment on the revelations noting that Burgess had not named the nation involved in the spy ring.

“Espionage and foreign interference are happening in Australia and ASIO has been onto it like a shot. I want people to understand, those states that operate in the shadows, we have a very simple message – we are watching you,” O’Neil said on Thursday.

When he delivered his annual threat assessment speech on Tuesday evening, Burgess described a major spying operation that his agency had disrupted.

‘Proxies and agents were recruited as part of a wider network. Among other malicious activities, they wanted to steal sensitive information.’

ASIO director-general Mike Burgess

Burgess declined to name the country involved and ASIO subsequently refused to answer questions sent by this masthead.

“Consistent with long-standing practice, ASIO does not comment on operational or intelligence matters,” a spokesman said in a statement.

However, sources with knowledge of the Russian spy ring have described it in identical terms as Burgess, who said on Tuesday it was “bigger and more dangerous” than another major recent espionage operation ASIO had dismantled.

In 2022, Burgess described that earlier thwarted espionage operation as involving a “nest” of spies.

The sources confirmed Burgess’ comments this week referred to the larger and more recent Russian spy ring, a larger “hive” of spies working “undeclared” or “undercover”.

“Some were put in place years earlier,” Burgess said in his Tuesday speech in comments that match descriptions from sources about the use of Russian diplomatic cover by the spy ring.

‘Proxies and agents were recruited as part of a wider network. Among other malicious activities, they wanted to steal sensitive information,’ Burgess said in his speech.

“I’m not going into more detail because the foreign intelligence service is still trying to unpick exactly what and how we knew about its activities. It was obvious to us that the spies were highly trained because they used sophisticated tradecraft to try to disguise their activities.

“They were good – but ASIO was better. We watched them. We mapped their activities. The hive is history.”

In March 2018, the Turnbull government announced it was expelling two Russian diplomats as part of global action against Moscow over an alleged nerve agent attack on a former Russian spy living in the UK. Turnbull said the pair were undeclared intelligence officers and had been ordered to leave Australia within seven days.

The Morrison government was largely silent on the issue of expulsions of Moscow’s operatives after Western nations announced they were deporting Russian spies after the invasion of Ukraine.

In March 2022, the US government expelled 12 Russian diplomats from New York for “engaging in espionage activities”.

Across Europe, an estimated 400 suspected Russian spies were expelled from Moscow’s diplomatic posts as part of a campaign of sanctions and military support in retaliation against Putin’s invasion of Ukraine.

ASIO has a long history of countering Moscow-directed spying. The organisation was created in 1949 to probe suspected leaking of Australian government secrets to the Soviet Union.

### **Hong Kong expats trying to join British Army targeted by suspected Chinese spy on Telegram**

By Joe Duggan

March 3, 2023 12:21 pm(Updated 4:05 pm)

<https://inews.co.uk/news/hong-kong-expats-join-british-army-targeted-chinese-informant-telegram-2185613>

Hong Kongers in the UK who are hoping to join the British Army have reported being targeted by a suspected undercover Chinese Communist Party (CCP) spy in their Telegram group chat.

The approach to a Telegram channel for recruits to the Armed Forces in the UK under the British National Overseas (BNO) visa came from an unidentified person pretending to be a Reuters journalist using fake photographic ID in early January, the group said.

It came just a week before an online seminar was held for Hong Kongers looking to join the UK military was held along with other community groups.

Hong Kongers in Britain, an expatriate group which co-hosted the military seminar, condemned the “suspected espionage”, which it said could put army recruits “at potential risk”.

China's repressive national security law, which was imposed in 2020, led to more than 160,000 Hong Kongers fleeing to the UK under the BNO visa.

The security law, which purports to apply overseas and has been used to try and crush dissent in Hong Kong, criminalises any act Beijing deems as secession, subversion, terrorism or collusion with foreign or external forces.

It comes as i also reveals how Hong Kong dissidents who have fled to the UK have been followed and harassed by suspected pro-Chinese Communist Party informants recruited to monitor them.

The Telegram channel's administrators became suspicious and declined requests for an interview after being asked "strange questions", including whether they had "violated" the repressive security law imposed by China.

After an Australia-based Chinese activist and dissident artist known as Badiuca first revealed on Twitter that he and other activists had been approached by a fake reporter using the same false ID, the Telegram channel posted a warning to its followers.

On Tuesday, Reuters reported that two of their journalists had their identities faked by an unknown person or people who used fake social media accounts to engage with Chinese activists online for several months.

"The situation is serious. There is a suspected CCP spy pretending to be a reporter to admin," the Telegram channel for Hong Kong military recruits wrote.

The group, which has subsequently changed its name and removed the message, said it "wants to remind everyone that the infiltration of CCP secret agents is real".

It said: "They are afraid that Hong Kong people are joining the army abroad. We have to actively make them even more afraid."

A spokesperson for Hong Kongers in Britain condemned the "chilling" report of impersonation to "try accessing sensitive information".

"We believe such impersonation already amounts not only to frauds, but is suspected and seen as espionage to know the internal process of military recruitment, which may put people into a potential risk," they said.

Joining the armed forces was "legitimate and usual in every country and should be respected as citizen rights and national sovereignty", they added.

Someone from the Hong Kongers in Britain group had been in touch with the Telegram group's administrator and asked them to report it to the relevant authorities.

The group was now reviewing its sign-up process for future events, but screening participants was difficult as "intelligence gatherers" could still register using a fake name or email address.

The Bill is set to update existing espionage legislation, with new offences designed to combat state-linked sabotage and foreign interference. However, there remains concerns about how some elements of the Bill could restrict reporting by UK journalists.

It comes after the Chinese government was accused of setting up three secret police stations in the UK.

Last month, i revealed that a hidden Chinese tracking device was found in a UK Government car after intelligence officials stripped back vehicles amid growing concerns over spyware.

A Government spokesperson said: "The Hong Kong BNO programme funds charities and community groups including Hong Kongers in Britain to support those settling here. The Department for Levelling Up, Housing and Communities has no direct involvement in individual events."

"The Government continually assess potential threats to those in the UK. The Home Office works across government, with relevant agencies and law enforcement to protect people identified as being at risk, to ensure the UK is a safe and welcoming place for all."

"Anyone who believes that a crime has been committed or is concerned for their safety should contact the police."

i has contacted Hong Kong and Chinese authorities for comment.

A spokesperson for Hong Kong's Security Bureau said: "In conducting any operation, the police act on the basis of actual circumstances and according to the law. The police do not comment on individual cases."

"Members of the public are encouraged to report to the police if there is any suspected crime. The police will take appropriate actions on reports of crime accordingly."

## **Great Britain**

### **Navy intercepts Iran's arms runners**

George Grylls - Defence Correspondent

At 4am an American MQ-9 Reaper drone had spotted the boat, which was suspected of smuggling. The marines on the Type 23 frigate intercepted the vessel last week and confiscated a haul of anti-tank missiles.

"Fortunately I was awake," Commander Paul Irving said, recalling the events of February 23. "It was a very early start. But we got up that morning anticipating the task from dawn. We were ready for a boarding that day but we didn't know what form it might take. We certainly didn't expect to find what we did."

The skiff had been heading south from Iran, which has been accused of arming Houthi rebels in Yemen as part of a proxy war with Saudi Arabia. Despite campaigners taking legal action against ministers over arms sales, Britain remains a close ally of Saudi Arabia. A visit there this week by Ben Wallace, the defence secretary, was the latest demonstration of the government's steadfast support for its Middle Eastern ally.

As the first sunlight softened the Gulf skies, Irving readied the crew of 200 sailors. He manoeuvred the 4,900-tonne vessel into position, sent a helicopter to inspect the skiff with its infrared cameras and told a dozen Royal Marines from 42 Commando to prepare for action.

"We got a Wildcat helicopter up to have a look," Irving said. "The cameras were able to peer inside the vessel. They saw two people and stores under what looked like a tarpaulin."

At first the crew on the skiff ignored the order to stop and kept pushing ahead. The pair soon halted, perhaps because they feared the helicopter could chop up the waters — a tactic adopted by the Royal Navy — and probably they were not too attached to their cargo. "Smugglers are smugglers," Irving said. "They get paid to transfer whatever their cargo is. Often they don't know what they're moving."

Irving ordered the commandos to board the boat in the light of a new day. The marines were prepared for trouble but the smugglers were unarmed.

"Fortunately most of the boardings we do, there might be some small arms on the vessel, but it is very rare for them to be used in a threatening way towards a boarding team," Irving said.

The smugglers had no guns but hidden on their vessel was a cache of weapons that shocked even the seasoned marines. The skiff was carrying Dehlavieh anti-tank guided 9M133 missiles modelled on Russian designs.

Stashed beneath the tarpaulin, the commandos also found components that could make medium-range ballistic missiles. It was an impressive haul for HMS Lancaster after taking over from HMS Montrose as the permanent frigate in the Gulf at the end of last year.

HMS Lancaster was one of three Royal Navy frigates that spent much of last summer shadowing two Russian warships around Ireland and the UK.

The Marshal Ustinov, a Slava-class cruiser, was patrolling international waters in August and September and came menacingly close to the UK mainland several times, even entering Ireland's exclusive economic zone at one point. With the destroyer Vice-Admiral Kulakov, the Marshal Ustinov had its own reasons to be wary. Its sister ship the Moskva had been sunk a few months earlier in the Black Sea.

In the Middle East, HMS Lancaster forms part of an international effort to crack down on drugs and weapons smuggling. Last year, HMS Montrose seized £47 million worth of narcotics and confiscated Iranian weapons including cruise missiles and drones.

But within a couple of months of taking over duties, HMS Lancaster has now notched up its own major haul.

"We haven't celebrated yet because we're still at sea," Irving said. "We were straight back out on operations the next day."

## **Anger as leading tech conference advises Belfast visitors 'black taxis are run by IRA'**

The memo relates to security around conference CyberUK which is due in Belfast next week (Stock image)

Kurtis Reid

Belfast Telegraph

Fri 14 Apr 2023 at 12:00

<https://www.belfasttelegraph.co.uk/news/northern-ireland/anger-as-leading-tech-conference-advises-belfast-visitors-black-taxis-are-run-by-ira/347493856.htm> 1

A security briefing document warning attendees at a Belfast tech conference not to take black cab tours "because they are run by the IRA" has been withdrawn. Organisers said it was "sent in error by a contractor" and contained "significant factual inaccuracies".

The document concerned preparations for visitors to CyberUK's 2023 conference next week.

The memo, reported by the BBC's Nolan Show, also stated those with "English accents" will not be welcome in certain parts of the city, and warned that security may be compromised if delegates were to "eat outside the city centre".

It is understood potential attendees were advised to say they were "under a non-disclosure agreement" if asked why they are in Belfast, and to not use the term "CyberUK" outside of the conference venue.

CyberUK is a flagship event organised by the National Cyber Security Centre.

It is due to take place in Belfast next Wednesday and Thursday, with the theme of "securing an open and resilient digital future".

Guests from across the world's tech security sector will be in attendance.

The National Cyber Security Centre distanced itself from the document.

A spokesperson said: "This is not an NCSC document. It was sent in error by a contractor and contains significant factual inaccuracies. The document has been withdrawn."

"If I was a taxi driver in Belfast I would feel that this, number one, created a level of risk; and, number two, was defamatory to me and to the organisation."

In reference to advice warning against "walking around housing estates which surround the city", he added: "It's utterly offensive and unhelpful. These companies need to come out and issue an apology."

"Those involved need to sit back and reflect on what is going on here."

"If you go to an event in any part of the world and there have been high levels of crime, you may say be careful in certain areas... that's totally different."

Tour operator Norman Reilly, who runs Taxi Tours Belfast, said the contents of the document were "a lot of nonsense".

"It's damaging for my business and other businesses and damaging for the working-class people of those communities," he told the BBC.

A black taxi driver interviewed by Nolan, identified as Pat, said the document could be "putting drivers' lives in danger".

He said several Belfast taxi drivers had just finished providing transport associated with President Biden's visit, meaning they were "completely vetted by US Secret Service".

He added: "My friends in the Shankill and I provide tours and for someone to say we are IRA men... I am absolutely disgusted."

Belfast City Council said it did not endorse the comments.

<https://www.belfasttelegraph.co.uk/news/northern-ireland/anger-as-leading-tech-conference-advises-belfast-visitors-black-taxis-are-run-by-ira/347493856.html>

*Thanks AnonNI who commented 'It is understood potential attendees were advised to say they were "under a non-disclosure agreement" if asked why they are in Belfast. That is definitely a good way \*to draw attention\* to yourself in Belfast!*

## Russian hackers are attempting to 'destroy' UK infrastructure, warns minister

Sian Elvin

Wednesday 19 Apr 2023 10:42 am

<https://metro.co.uk/2023/04/19/warning-russian-hackers-are-attempting-to-destroy-uk-infrastructure-18635721/>

Oliver Dowden said an 'official threat notice' has been issued to operators of critical cyber infrastructure (Picture: PA / Rex)  
The UK is facing 'ideologically motivated' threats from pro-Kremlin hacking groups, a government minister has warned.

Oliver Dowden, the chancellor of the Duchy of Lancaster, today confirmed the National Cyber Security Centre (NCSC) has issued an 'official threat notice' to operators of critical national infrastructure.

'Disclosing this threat is not something we do lightly,' he told the CyberUK conference in Belfast this morning.

'But we believe it is necessary at this point in time, if we want these companies to understand the current threat they face, and to take action to defend themselves and the country against such attacks.'

The NCSC said there is an 'emerging risk posed by state-aligned adversaries' as a result of the Russia-Ukraine war, and organisations need to 'act now' to protect themselves against attacks.

Mr Dowden said these Russian-aligned groups now have a motive to 'disrupt or destroy' UK infrastructure.

He added they are 'ideologically motivated, rather than financially motivated', which makes them 'particularly concerning'.

The chancellor of the Duchy of Lancaster addressed the CyberUK conference in Belfast this morning (Picture: PA)  
Mr Dowden, who is also responsible for national investment security, also used the conference to announce new measures to support businesses 'on the front line of our cyber defences'.

He said: 'These are the companies in charge of keeping our country running. Of keeping the lights on.'

'Our shared prosperity depends on them taking their own security seriously, and that extends to their cybersecurity.'

'A bricks-and-mortar business wouldn't survive if it left the back door open to criminals every night. Equally in today's world, businesses can't afford... to leave their digital back door open to cyber crooks and hackers.'

'So the safer we make our defences, the safer we make our country – and the more attractive we become as a destination for entrepreneurs and investors all over the world.'

'The fact that the UK has in the last few years taken cybersecurity so seriously already makes us one of the best places in the world to invest.'

One of these measures is a new 'GovAssure' cybersecurity audit, which will be run from the Cabinet Office to check the UK's critical IT systems.

Mr Dowden further admitted the government 'needs to break through its own glass ceiling' and look at improving salaries to help attract cybersecurity experts into the civil service.

The head of the NCSC, Lindy Cameron, later told the conference: 'I don't think we are yet doing enough to protect our infrastructure from the cyber threats emerging from Russia-aligning groups.'

'If the UK is to be the safest place to live and work online, then resilience must urgently move to the top of our investment shopping list.'

He added: 'These are people protecting the systems and public services that millions of people across the country rely on every day, so we should want the very best people in charge of them. We must be competitive to stay ahead.'

There have been increasing concerns about cyber attacks in recent years.

The Royal Mail postal service faced severe disruption due to a cyber attack in January this year.

Printers at a distribution site near Belfast, in Northern Ireland, reportedly started printing ransom notes from LockBit, which is a hacker group widely thought to have close links to Russia.

## Russia

### **Pictures emerge of Russian ships off west coast of Ireland**

Updated / Sunday, 2 April 2023 19:37

<https://www.rte.ie/news/munster/2023/0402/1367830-russian-ships/>

By Jennie O'Sullivan

Pictures have emerged of the Russian-registered ships that have been causing concern off the west and southwest coast of Ireland over the past week.

The images released by the Air Corps reveal three ships, not two as previously reported.

The three Russian-registered commercial vessels, the UMKA - an off-shore supply vessel, the BAHKTEMIR - a salvage and rescue ship and the FORTUNA - a pipelay/crane vessel, first departed from the Russian port of Murmansk on 23 February on a course for the Equatorial Guinea port of Malobo on the west coast of Africa.

At least two of the Russian ships were first sighted off the Galway coast late last week in the vicinity of a newly opened sub-sea communications cable.

The vessels then left the Irish Exclusive Economic Zone before re-appearing again without explanation off the north Kerry coast, west of An Daingean on Friday.

Their movements were monitored by the Air Corps, and by the Naval Service from their base at Haulbowline.

There was no Irish naval ships at sea on Friday due to a lack of personnel.

While the presence of the ships initially "raised serious concerns" among Irish military officials, later analysis, according to the Irish Times, "determined the ships' unusual movements were probably a result of efforts to avoid bad weather, rather than anything sinister".

Ship tracking software now places the vessels south of the English coast en route for the Bay of Biscay.

In a statement issued this evening, the Defence Forces said the Irish Air Corps and the Irish Naval Service "had observed Russian commercial vessels in international waters off the island of Ireland as part of their Maritime, Defence & Security Operations".

They said they "continue to monitor activity in Irish waters and to undertake maritime Defence and Security Operations throughout Ireland's maritime domain".

(Pictures courtesy of Irish Defence Forces)

Really worth a look for the ships found off Irish coastal waters ..... Thanks to AnonNI

## United States

### **Leaker of U.S. secret documents worked on military base, friend says**

THE DISCORD LEAKS | The online group that received hundreds of pages of classified material included foreigners, members tell The Post  
By Shane Harris and Samuel Oxford  
April 12, 2023 at 9:36 p.m. EDT

<https://www.washingtonpost.com/national-security/2023/04/12/discord-leaked-documents/>

The man behind a massive leak of U.S. government secrets that has exposed spying on allies, revealed the grim prospects for Ukraine's war with Russia and ignited diplomatic fires for the White House is a young, charismatic gun enthusiast who shared highly classified documents with a group of far-flung acquaintances searching for companionship amid the isolation of the pandemic.

United by their mutual love of guns, military gear and God, the group of roughly two dozen — mostly men and boys — formed an invitation-only clubhouse in 2020 on Discord, an online platform popular with gamers. But they paid little attention last year when the man some call "OG" posted a message laden with strange acronyms and jargon. The words were unfamiliar, and few people read the long note, one of the members explained. But he revered OG, the elder leader of their tiny tribe, who claimed to know secrets that the government withheld from ordinary people.

The young member read OG's message closely, and the hundreds more that he said followed on a regular basis for months. They were, he recalled, what appeared to be near-verbatim transcripts of classified intelligence documents that OG indicated he had brought home from his job on a "military base," which the member declined to identify. OG claimed he spent at least some of his day inside a secure facility that prohibited cellphones and other electronic devices, which could be used to document the secret information housed on government computer networks or spooling out from printers. He annotated some of the hand-typed documents, the member said, translating arcane intel-speak for the uninitiated, such as explaining that "NOFORN" meant the information in the document was so sensitive it must not be shared with foreign nationals.

OG told the group he toiled for hours writing up the classified documents to share with his companions in the Discord server he controlled. The gathering spot had been a pandemic refuge, particularly for teen gamers locked in their houses and cut off from their real-world friends. The members swapped memes, offensive jokes and idle chitchat. They watched movies together, joked around and prayed. But OG also lectured them about world affairs and secretive government operations. He wanted to "keep us in the loop," the member said, and seemed to think that his insider knowledge would offer the others protection from the troubled world around them.

"He's a smart person. He knew what he was doing when he posted these documents, of course. These weren't accidental leaks of any kind," the member said.

The transcribed documents OG posted traversed a range of sensitive subjects that only people who had undergone months-long background checks would be authorized to see. There were top-secret reports about the whereabouts and movements of high-ranking political leaders and tactical updates on military forces, the member said. Geopolitical analysis. Insights into foreign governments' efforts to interfere with elections. "If you could think it, it was in those documents."

In those initial posts, OG had given his fellow members a small sip of the torrent of secrets that was to come. When rendering hundreds of classified files by hand proved too tiresome, he began posting hundreds of photos of documents themselves, an astonishing cache of secrets that has been steadily spilling into public view over the past week, disrupting U.S. foreign policy and aggravating America's allies.

This account of how detailed intelligence documents intended for an exclusive circle of military leaders and government decision-makers found their way into and then out of OG's closed community is based in part on several lengthy interviews with the Discord group member, who spoke to The Washington Post on the condition of anonymity. He is under 18 and was a young teenager when he met OG. The Post obtained consent from the member's mother to speak to him and to record his remarks on video. He asked that his voice not be obscured.

Dozens of highly classified documents have been leaked online, revealing sensitive information intended for senior military and intelligence leaders. In an exclusive investigation, The Post also reviewed scores of additional secret documents, most of which have not been made public. Where did they come from? The top-secret documents appear to be — at least partly — from the Pentagon and many seem to have been prepared for senior military officials. Post reporting revealed that a man in his early to mid-20s allegedly shared them with members of an invitation-only Discord group. What do the leaked documents reveal about Ukraine? The documents reveal profound concerns about the war's trajectory and Kyiv's capacity to wage a successful offensive against Russian forces. According to a Defense Intelligence Agency assessment among the leaked documents, "Negotiations to end the conflict are unlikely during 2023."

What else do they show? The files include summaries of human intelligence on high-level conversations between world leaders, as well as information about advanced satellite technology the United States uses to spy.

They also include intelligence on both allies and adversaries, including Iran and North Korea, as well as Britain, Canada, South Korea and Israel.

What happens now? The leak has far-reaching implications for the United States and its allies. In addition to the Justice Department investigation, officials in several countries said they were assessing the damage from the leaks.

His account was corroborated by a second member who read many of the same classified documents shared by OG, and who also spoke on the condition of anonymity. Both members said they know OG's real name as well as the state where he lives and works but declined to share that information while the FBI is hunting for the source of the leaks. The investigation is in its early stages, and the Pentagon has set up its own internal review led by a senior official.

"An interagency effort has been stood up, focused on assessing the impact these photographed documents could have on U.S. national security and on our Allies and partners," Pentagon deputy press secretary Sabrina Singh said in a statement.

Discord said in a statement that it is cooperating with law enforcement and has declined to comment further.

The Post also reviewed approximately 300 photos of classified documents, most of which have not been made public; some of the text documents OG is said to have written out; an audio recording of a man the two group members identified as OG speaking to his companions; and chat records and photographs that show OG communicating with them on the Discord server.

The young member was impressed by OG's seemingly prophetic ability to forecast major events before they became headline news, things "only someone with this kind of high clearance" would know. He was by his own account enthralled with OG, who he said was in his early to mid-20s.

"He's fit. He's strong. He's armed. He's trained. Just about everything you can expect out of some sort of crazy movie," the member said.

In a video seen by The Post, the man who the member said is OG stands at a shooting range, wearing safety glasses and ear coverings and holding a large rifle. He yells a series of racial and antisemitic slurs into the camera, then fires several rounds at a target.

The member seemed drawn to OG's bravado and his skill with weapons. He felt a certain kinship with a man he described as "like an uncle" and, on another occasion, as a father figure.

"I was one of the very few people in the server that was able to understand that these [documents] were legitimate," the member said, setting himself apart from the others who mostly ignored OG's posts.

"It felt like I was on top of Mount Everest," he said. "I felt like I was above everyone else to some degree and that ... I knew stuff that they didn't."

The member met OG about four years ago, on a different server for fans of Oxide, a popular YouTuber who streams videos about guns, body armor and military hardware. He said a group of avid members found the server too crowded and wanted a quieter place to talk about video game tactics, so they broke off into their own, small group.

More like-minded Oxide fans joined the private Discord server, which came to be named "Thug Shaker Central," and whose membership OG would effectively control as the administrator.

"We all grew very close to each other, like a tightknit family," the member said. "We depended on each other." He said that other members, and OG especially, counseled him during bouts of depression and helped to steady him emotionally. "There was no lack of love for each other."

OG was the undisputed leader. The member described him as "strict." He enforced a "pecking order" and expected the others to read closely the classified information he had shared. When their attention waned, he got angry.

Late last year, a peeved OG fired off a message to all the members of the server. He had spent nearly an hour every day writing up "these long and drawn-out posts in which he'd often add annotations and explanations for stuff that we normal citizens would not understand," the member said. His would-be pupils were more interested in YouTube videos about battle gear.

"He got upset, and he said on multiple occasions, if you guys aren't going to interact with them, I'm going to stop sending them."

That's when OG changed tactics. Rather than spend his time copying documents by keyboard, he took photographs of the genuine articles and dropped them in the server. These were more vivid and arresting documents than the plain text renderings. Some featured detailed charts of battlefield conditions in Ukraine and highly classified satellite images of the aftermath of Russian missile strikes on Ukrainian electrical facilities. Others sketched the potential trajectory of North Korean ballistic nuclear missiles that could reach the United States. Another featured photographs of the Chinese spy balloon that floated across the country in February, snapped from eye-level, probably by a U-2 spy plane, along with a diagram of the balloon and the surveillance technology attached to it.

OG shared several documents a week, beginning late last year. Posting pictures to the server took less time. But it also exposed OG to greater risk. In the background of some images, they could see items and furniture that they recognized from the room where OG spoke to them via video on the Discord channel — the kind of clues that could prove useful for federal investigators.

The dramatic and yet nonchalant presentation also reminded the group that OG could lay his hands on some of the most closely guarded intelligence in the U.S. government. “If you had classified documents, you’d want to flex at least a little bit, like hey, I’m the big guy,” the member said. “There is a little bit of showing off to friends, but as well as wanting to keep us informed.”

In a sense, OG had created a virtual mirror image of the secretive facility where he spent his working hours. Inside the Discord server, he was the ultimate arbiter of secrecy, and he allowed his companions to read truths that “normal citizens” could not.

#### A breach of secrecy

The photographs of printed secret documents now seen by millions may offer clues to the federal agents searching for OG. Reality Winner, who leaked secret National Security Agency documents to the news website the Intercept in 2017, was compromised by secret markings on printouts that helped narrow the search. OG’s documents look to have been printed on ordinary paper and were creased after having been folded in four. Sometimes, the photographs OG took of the documents appeared to have been taken over a bed. Items such as Gorilla Glue, a scope manual and nail clippers appeared in the margins. Other previously unreported images reviewed by The Post showed printed documents lying on top of a glowing red keyboard.

The breadth of the military and intelligence reports was extensive. For months, OG regularly uploaded page after page of classified U.S. assessments, offering a window into how deeply American intelligence had penetrated the Russian military, showing that Egypt had planned to sell Russia tens of thousands of rockets and suggesting that Russian mercenaries had approached Turkey, a NATO ally, to buy weapons to fight against Ukraine.

Egyptian President Abdel Fatah El-Sisi, left, with Russian President Vladimir Putin in 2018. Among the leaked documents were a U.S. military assessment that Egypt planned to sell Russia tens of thousands of rockets as Moscow wages war in Ukraine. (Alexei Druzhinin/Sputnik/Pool/AP)  
At least one of the documents appeared to have been printed from Intellipedia, a data-sharing system that intelligence agencies use to collaborate and post reports and articles.

The documents were another lesson for younger members in how OG thought the world really worked. The member said OG wasn’t hostile to the U.S. government, and he insisted that he was not working on behalf of any country’s interests. “He is not a Russian operative. He is not a Ukrainian operative,” the member said. The room on the server where he posted the documents was called “bear-vs-pig,” meant to be a snide jab at Russia and Ukraine, and an indication that OG took no sides in the conflict.

But OG had a dark view of the government. The young member said he spoke of the United States, and particularly law enforcement and the intelligence community, as a sinister force that sought to suppress its citizens and keep them in the dark. He ranted about “government overreach.”

OG told his online companions that the government hid horrible truths from the public. He claimed, according to the members, that the government knew in advance that a white supremacist intended to go on a shooting rampage at a Buffalo supermarket in May 2022. The attack left 10 dead, all of them Black, and wounded three more. OG said federal law enforcement officials let the killings proceed so they could argue for increased funding, a baseless notion that the member said he believes and considers an example of OG’s penetrating insights about the depth of government corruption.

OG’s group itself had a dark side. The Discord server’s eventual name, Thug Shaker Central, was a racist allusion, and signaled to members that they were free to hurl epithets and crude jokes. The young member expressed some regret for their behavior but seemed to shrug off the offensive remarks as a clumsy attempt at humor.

It was not “a fascist recruiting server,” he told The Post.

One thing the members were not supposed to do was talk about the secrets OG had shared with them, including the classified documents.

“Most people in the server were smart enough as to kind of realize that … they shouldn’t be posted anywhere else,” the member said. And yet, the group contained foreign citizens — including from Russia and Ukraine, the members said — a defiance of the NOFORN warning printed across the top of so many documents OG shared.

The member estimated that the server hosted people from Europe, Asia and South America. “Just about every walk of life.” Of the roughly 25 active members who had access to the bear-vs-pig channel, about half were located overseas, the member said. The ones who seemed most interested in the classified material claimed to be from mostly “Eastern Bloc and those post-Soviet countries,” he said. “The Ukrainians had interest as well,” which the member chalked up to interest in the war ravaging their homeland.

For years, U.S. counterintelligence officials have eyed gaming platforms as a magnet for spies. Russian intelligence operatives have been suspected of befriending gamers who they believe work for intelligence agencies and encouraging them to divulge classified information, a senior U.S. official said, speaking on the condition of anonymity to discuss sensitive information.

It’s not clear whether any of those efforts have been successful. But if foreign operatives finagled an invitation to OG’s server, they would have been free to view the documents and make copies of them, as some members did.

#### The server sprouts a leak

All winter, OG uploaded documents to the server. No one talked about sharing them elsewhere. Then, unbeknown to the group, on Feb. 28, another teenage user from the Thug Shaker Central server began posting several dozen photographs showing classified documents on another Discord server affiliated with the YouTuber “wow\_mao.” Some of the documents offered detailed assessments of Ukraine’s defense capabilities and showed how far U.S. intelligence could see into Russia’s military command.

On March 4, 10 documents appeared on “Minecraft Earth Map,” a Discord server focused on the popular video game. A user operating the account that posted the smaller tranche of images told The Post they obtained them on wow\_mao.

Secret and top-secret documents were now available to thousands of Discord users, but the leak wouldn’t come to the attention of U.S. authorities for another month. Meanwhile, OG stopped sharing images in the middle of March. On April 5, classified documents assessing the war in Ukraine were posted on Russian Telegram channels and the message board platform 4chan, and began migrating to Twitter. One image, showing a March 1 Ukraine status update, had been crudely doctored to inflate the number of Ukrainian casualties and downplay those on the Russian side.

The next day, shortly before the New York Times first reported on the leak, OG came into the server “frantic, which is unusual for him,” the member said.

“He said something had happened, and he prayed to God that this event would not happen. … But now it’s in God’s hands.”

Not a whistleblower

For all OG's disdain for the federal government, the member said there was no indication that he was acting in what he thought was the public interest by exposing official secrets. The classified documents were intended only to benefit his online family, the member said.

"I would definitely not call him a whistleblower. I would not call OG a whistleblower in the slightest," he said, resisting comparisons to Edward Snowden, who shared classified documents about government surveillance with journalists.

Remarkably, the member said he has been in touch with OG in the past few days, even as an FBI manhunt is underway and the Pentagon launches its own inquiry into the leaks. After shutting the Thug Shaker Central server, OG moved the community to another server to communicate with his online family.

He "seemed very confused and lost as to what to do," the member said. "He's fully aware of what's happening and what the consequences may be. He's just not sure on how to go about solving this situation. ... He seems pretty distraught about it."

In his final message to his companions, OG admonished them to "keep low and delete any information that could possibly relate to him," the member said. That included any copies of the classified documents OG had shared.

When it dawned on them that OG was in grave peril and intended to disappear, the members of Thug Shaker Central "full-on sobbed and cried," the young member said. "It is like losing a family member."

In hours of interviews, he continued to express admiration and loyalty to a man who may have endangered his young followers by allowing them to see and possess classified information, exposing them to potential federal crimes.

"I figured he would not be putting us in any sort of harm's way," the member said.

The exposure of the documents has severed friendships and cut him off from the man who buoyed his confidence and made him feel safe. The member said that the stress of the loss, coupled with the enormity of the leaks, has left him worried and sleepless.

Now he says he believes that the world should see the secrets OG passed along to a tiny group. He argued that the public deserves to know how intelligence agencies spend their tax dollars, and was particularly outraged that the documents show U.S. surveillance of foreign allies.

But what the young man regarded as a revelation will come as no surprise to the countries whose officials the U.S. has been monitoring for decades. While rarely discussed, and embarrassing for Washington when exposed, it's widely understood that the U.S. intelligence community monitors many friendly governments, just as foreign allies try to do the same.

Thousands of military personnel and government employees around OG's age, working entry-to-low-level positions, could plausibly have access to classified documents like the ones he allegedly shared, according to U.S. officials and experts who have seen the documents reported in the media. Despite what his young followers thought, OG would have had no special knowledge compared with his peers. He possessed no special power to predict events. Rather, he appears to have persuaded some highly impressionable teenagers that he's a modern-day gamer meets Jason Bourne.

The member said he's confident the authorities will find OG. But when they do, he won't be charged. Instead, he believes, OG will be imprisoned without due process at Guantánamo Bay or disappeared to a "black site," if he's not "assassinated" for what he knows.

The member, as well as the OG follower who corroborated his account, found no fault in their leader's actions and instead said they blame the teen who posted the documents on the wow\_mao server for wrecking their community.

"Maybe we should have had better opsec," the member said, harnessing the jargon of military and intelligence personnel for "operations security."

He said he will not divulge OG's identity or location to law enforcement until he is captured or can flee the United States. "I think I might be detained eventually. ... I think there might be a short investigation on how I knew this guy, and they'll try to get something out of me. They might try to threaten me with prison time if I don't reveal their identity."

To date, no federal law enforcement officials have contacted the young group member. Asked why he was prepared to help OG even at the risk of his own freedom, the young man replied without hesitation: "He was my best friend."

The last transmission from M23 was aired on Saturday, 31 December 2022 although, as reported, the hourly 'dits' remained on-air continuously throughout January & February 2023. Active transmissions returned in March & as always, we are indebted to Ary, (AB), for his logs & for alerting us to this latest wave of activity.

The first log we received was for Tuesday, 07 March with increasing transmissions noted over the following days with hourly 'beeps' where no transmission was sent;

1800z							ST3	ST3	ST3	ST3	
1856z				ST3	ST3						

Clock used by M23 is not locked to a time standard. As month progressed the transmissions appeared slightly earlier each day & by 22 March the H+56 transmissions were now H+55. A reset looked to have been performed on 01 April, (PC clock?), as the new schedules were on time & hourly 'beeps' had returned to being on the hour.

In addition two short digital transmissions were often heard on the frequency. These were much weaker than M23 signals, so likely unrelated.

1245z Short digi sig (30s)  
1250z Short digi sig (30s)

**Peter, (PoSW),** was also monitoring the M23 transmissions. Here are his detailed logs & observations. (Note that Peter has logged the 1041z transmission as 555, vs 000 – It's a matter of interpretation as to which is correct. One uses 'dits' while the other uses 'Dashes'. So on to Peter's report:

As regards the number station scene, perhaps the most noteworthy point of the last couple of months is the return of M23 CW on 5345, noticed by chance in early March and has been showing up daily since albeit with several changes to the timing and contents.

A somewhat detailed M23 log shown below.

#### Return of M23 CW to 5345:-

The M23 Morse station which appears on 5345 kHz from time to time sending a slow repetitive group of three numbers, letters or a combination of the two showed up in early March. It had last been heard in December of last year and apparently ended its run on the 31st of that month, not being heard in January.

**07-Mar-23, Tuesday:-**

1046 UTC, 5345 kHz, M23 in progress sending "555", stopped around 1056z followed by a long key-down dash.  
1256 UTC, starting up with "030" until 1306z.  
1456 UTC, starting up, now sending "TST", stopped at 1526z approx.

**09-Mar-23, Thursday:-** heard the following:-

0951 to 1021 UTC, "TST".  
1041 to 1056 UTC, "555".  
1256 to 1306 UTC, "030".  
1326 to 1338 UTC, "541"  
No sign of "TST" at 1456z which had been heard on the 7th.  
1516 UTC, starting up with "333" until 1528z.

**10-Mar-23, Friday, some changes:-**

0951 UTC, no sign of "TST", a brief "blip" heard at approx. 0956z and nothing heard of "555" at 1041z.  
1231 UTC, starting up with "591" until 1243z.  
1326 UTC, starting up with "541", stopped at approx. 1338.  
1756 UTC, starting up with "591" until 1808.  
1856 UTC, starting up with "ST3", stopped just before 1916.

**11-Mar-23, Saturday, close to a radio tuned to 5345 for most of the day:-**

0903 UTC, in progress with "541", stopped 0908z.  
1231 UTC, starting up with "591", stopped 243z.  
1256 UTC, starting up with "ST3", stopped 1316z  
1326 UTC, starting up with "541", stopped 1338z.  
1756 UTC, starting up with "591", stopped 1808z.  
1856 UTC, starting up with "ST3", missed the ending.

Appeared to follow this schedule on the following days although only a couple of transmissions were monitored on each day - except that another sending was noted later in the month;-

**22-Mar-23, Wednesday:-** 1504 UTC, in progress sending "SET", must have missed this mid-afternoon transmission unless it is new.**24-Mar-23, Friday:-** Another day spent close to a radio on 5345, seven transmissions logged:-

0856 to 0908, "541".  
1231 to 1243, "591".  
1256 to 1316, "ST3".  
1326 to 1338, "541".  
1501 to 1531, "SET".  
1756 to 1808, "591".  
1856 to 1916, "ST3".

British Summer Time began on Sunday 26- March and it was noted that M23 stayed on UTC and so showed up one hour later local time on the 26<sup>th</sup> and 27th, but then moved by one hour:-

**28-Mar-23, Tuesday:-** 1420 UTC, in progress with "SET" an hour earlier UTC but at the same local time as that before BST started.

1701 UTC, starting up with "591", moved by one hour except that a correction has been made to bring the start time after the hour instead of four minutes before it.  
1801 UTC, starting up with "ST3".

On the following days the schedule was similar to that shown above on the 24th except that the timing had shifted as observed on the 28th. Carried on into April, monitoring scaled down to checking just a couple of transmissions each day as circumstances permitted, usually the first sending, "541" at 0800z and the mid-afternoon "SET" at 1400z, the assumption was that if two transmissions were still running then the others would too. However, this turned out not to be the case; a day's monitoring on 18-April showed that the "ST3" at 1200 and 1800 UTC had gone. The next occasion an opportunity arose to spend a day in earshot of a radio tuned to 5345 was on:

**23-Apr-23, Sunday:-**

0800 to 0812, "541".  
1135 to 1147, "591"  
1230 to 1242, "541"  
1405 to 1435, "SET"  
1700 to 1712, "591".

Rounded off to the nearest minute, times about ten or twelve seconds before. Still adhering to this schedule in the last days of April, start-stop times becoming earlier.

It must all mean something to someone!

*Thanks for your detailed report, Peter – Ed*

**M76** A detailed analysis can be found in ENIGMA Newsletter 93 – May 2016.

Difficult to receive with a good signal into the UK most of the time, monitors rely on various SDRs for logs of this station.

Many thanks again to Ary, (AB), for news of M76 activity, a station not reported for a very long time. I used to try for this several years ago on 3280kHz at 1650z – but always a difficult copy here and only audible part of the year. With the increased numbers of SDRs now available this would have been much easier. There was also an early sched at 0400z on 3294kHz but I never made that one! (Ed)

Ary reports that there are currently two daily schedules at 0500z & 1750z - Both on 10858kHz.

## **Marker Beacons (MX MXI)**

### **The 80m Beacon Activity Ceases**

The last observation of "D"/Sevastopol on 3593.7 kHz was made on 27/02/23. It is assumed that this new schedule has come to an end as previous outages during the month of February only lasted a single night. Either this propagation beacon is no longer operationally required (Sevastopol is no longer monitoring any associated 80 meters working channel) or the transmitter has suffered a fault. Given that the transmitter was being manually switched on for this new schedule it is also possible that the persons responsible are not present and this duty has not been passed on.

The return to life of the 3594 kHz cluster has been short lived. I did not notice any signals whilst operating digital modes at the end of January, signals were apparent on the 2nd of February. It is possible that operation started on the 1st. Initially "D" was joined by "S" Severomorsk but this did not last long - "S" was only noted on the air from 2/2 to the 5/2. The other former members of this cluster Kaliningrad (P) and Moscow (C) did not make an appearance.

On Friday, 12 March the beacon at Sevastopol 'D' reappeared after 14 days absence making a surprise return to 3594 kHz at 20:58, but has not been heard since.

### **Common and Precious**

The pirate beacon 'VVV DE COMMON AND PRECIOUS' noted by Robert, (RB), on 4095.4kHz in CW & RTTY on Sunday, 05 March

Here are Robert's, (RB), beacon logs in full;

### March 2023

"D" has not come up for its usual schedule on 80 meters for a couple of days now. Keying/message errors appear to be frequent occurrence across all the Sevastopol frequencies yet have not been noted for any of the stations.

27/02/23. "D" start up at 20:53. Normal keying.

28/2/23. 21:00 onwards: D 3593.7 kHz no sigs. "D" active on 5153.7 kHz (The only station active in this cluster). "S" observed on 10871.9 kHz (No other stations in this cluster). Dasher/"T" active on 4183.4 and 4184.7 kHz.

01/3/23. 21:00 onwards: D 3593.7 kHz no sigs. "D" on 5153.7 kHz active with faulty keying : "DDDDDD T". The same keying is present on 10871.7 kHz. "S" present on 10871.9 kHz. Dasher/"T" active on 4183.4 and 4184.7 kHz.

--  
The last observation of "D"/Sevastopol on 3593.7 kHz was made on 27/02/23. It is assumed that this new schedule has come to an end as previous outages during the month of February only lasted a single night. Either this propagation beacon is no longer operationally required (Sevastopol is no longer monitoring any associated 80 meters working channel) or the transmitter has suffered a fault. Given that the transmitter was being manually switched on for this new schedule it is also possible that the persons responsible are not present and this duty has not been passed on.

The return to life of the 3594 kHz cluster has been short lived. I did not notice any signals whilst operating digital modes at the end of January, signals were apparent on the 2nd of February. It is possible that operation started on the 1st. Initially "D" was joined by "S" Severomorsk but this did not last long - "S" was only noted on the air from 2/2 to the 5/2. The other former members of this cluster Kaliningrad (P) and Moscow (C) did not make an appearance.

Faulty keying has been present on a couple of occasions, albeit only on the beacons operated by Sevastopol and across all operational frequencies simultaneously. This usually takes the form of additional dots or dashes. It is hard to see how these would be generated by a solid state keying device - is it possible that the keying is done mechanically?

---

02/3/23. 21:05. 3rd day of "no sigs" from "D" on 80 meters. \* "S" present on 5153.9kHz. \* D, S and K active on 10872. \* Dasher/"T" active on 4183.4 and 4184.7 kHz.

03/3/23. \* 7039.4: M (Magadan). Heard on Tambov (RU) tuner whilst monitoring my own QRSS on 7039.7. \* D,P,S and a weak A (7509.1) present on the 7509 cluster. \* C on 8495. L on 8947.8. \* 10871: D, A (with slow keying).

04/3/23. \* Dasher/"T" active on 4183.4 and 4184.7 kHz. \* D, S on 5153 cluster. \* 7039.4: M. \* 7508 cluster: P, S, A. \* 8497.8kHz : L. \* 10871 Cluster: D, S, 10872.3: K (Petropavlovsk - Kamchatsky).

05/3/23 \* Dasher/"T" active on 4183.4 and 4184.7 kHz. \* D,A on 5153 cluster. \* 7039.4: M. 7508 cluster: D, P, S, A. \* 8497.8: L. \* 10871 Cluster: S, K.

Interesting extra: \* 4095.4 kHz: CW and RTTY - VVV DE COMMON AND PRECIOUS - pirate beacon.

06/3/23. \*Dasher/T absent. \* D,A on 5153 kHz cluster. \* 5156.8 KHz L. \* 7039.4 kHz: M. \* 7508 kHz Cluster: D,P,S,A. \* 8497.8 kHz: L. \* 10871 kHz Cluster: D,S.

07/3/23. No observations.

08/3/23. \* Dasher/"T" active on 4183.4 and 4184.7 kHz. \* D,S on 5153 cluster. \* 5156.8 KHz L absent. \* 7039.4 kHz: M. \* 7508 kHz Cluster: D,P,S,A. \*8495 kHz cluster: S,C. \* 8497.8 kHz: L. \* 10871 kHz Cluster: D,S,A,K. \* 13527.9 kHz: S

09/3/23 \* 19:00 - 19:20 4171 KHz CW number/letter groups at c. 1-2 minute intervals - M21 Rus air defence? \* Dasher/"T" active on 4183.4 and 4184.7 kHz. \* D,S,A on 5153 cluster. \* 7039.4 kHz: M. \* 7508 kHz Cluster: D,P,S,A. \*8495 kHz cluster: C. \* 10871 kHz Cluster: D,S,A,K (K= four repeats and a pause). \* 13527 kHz cluster: D,S,C,A,F,K

10/3/23 \* Dasher/"T" active on 4183.4 and 4184.7 kHz. \* D on 5153 cluster. \* 5156.8 KHz L. \* 7039.4 kHz: M. \* 7508 kHz Cluster: D,P,S,A. \*8495 kHz cluster: C. \* 10871 kHz Cluster: D,S,A,K (K= four repeats and a pause). \* 13527 kHz cluster: D,S,A.

11/3/23 \* Dasher/"T" active on 4183.4 and 4184.7 kHz. \* D,S on 5153 cluster. \* 7039.4 kHz: M. \* 7508 kHz Cluster: D,P,S,A. \* 10871 kHz Cluster: D,S,A. \* 13527 kHz cluster: D.

#### Of note is the return to 80 meters of Sevastopol/D this evening after 14 days absence.

12/3/23 \* "D" made a surprise return to 3594 kHz at 20:58. \* Dasher/"T" active on 4183.4 and 4184.7 kHz. \* D,S,A on 5153 cluster. \* 7039.4 kHz: M. \* 7508 kHz Cluster: D,P,S,A. \*8497.8 kHz cluster: L. \* 10871 kHz Cluster: D,S,A, \* 13527 kHz cluster: D,S,C,A.

13/3/23 \* No sigs from D on 3593.7 kHz. \* Dasher/"T" active on 4183.4 and 4184.7 kHz. \* D,S,A on 5153 cluster. \* 7039.4 kHz: M. \* 7508 kHz Cluster: D,P,S,A. \* 8495 cluster: S. \*8497.8 kHz: L. \* 10871 kHz Cluster: D,S,A,K (K = four repetitions and a pause).

14/3/23 \* No sigs from D on 3593.7 kHz. \* Dasher/"T" active on 4182, 4183.4 and 4184.7 kHz. \* D,S,A on 5153 cluster. \* 7039.4 kHz: M. \* 7508 kHz Cluster: D,P,S,A. \* 8495 cluster: S. \*8497.8 kHz: L. \* 10871 kHz Cluster: D,S,A,K (K = four repetitions and a pause).

15/3/23 \* No sigs from D on 3593.7 kHz. \* Dasher/"T" active on 4183.4 and 4184.7 kHz. \* D,S,A on 5153 cluster. \* 7039.4 kHz: M. \* 7508 kHz Cluster: D,S,A. \* 8495 cluster: S,A. \*8497.8 kHz: L. \* 10871 kHz Cluster: D.

16/3/23 \* No sigs from D on 3593.7 kHz. \* Dasher/"T" active on 4183.4 and 4184.7 kHz. \* D,S on 5153 cluster. \* 7039.4 kHz: M. \* 7508 kHz Cluster: P,S. \* 8495 cluster: C. \*8497.8 kHz: L. \* 10871 kHz Cluster: D,S,A,K (K = four repetitions and a pause).

## April 2023

Of note this month is the Western Military District transmissions from Osnova-98 on 4183 kHz have ceased for a couple of days. Too early to tell if this is for good or merely a break for maintenance.

The other station of note is MXI "V" (probably Khiva) on 4031 kHz. This frequency previously noted by N&O to have been used by P/Khalingrad.

-----  
1/4/23 \*4183/4184 kHz T. \* 5153 kHz cluster: D,P,S,C,A. \* 5156.8 KHz L. \* 7039.4 kHz: M. \* 7508 kHz Cluster: D,S,A. \*8495 cluster: C. \*8497.8 kHz: L. \* 10871 kHz Cluster: D,S,C,A,K (K = four repetitions and a pause). \* 13527 cluster: D,S,A,K (K = four repetitions and a pause). \*16332 Cluster: D,C.

-----  
This week's observations of the various MX/MXI beacons (+ Osnova-98). Not a CW beacon as such but notable by its regular absence after being such a stable station. Perhaps the western defence units it is intended to communicate with are currently "away from home"?). 'L' on 5156.7 kHz has been absent for the last five days. If it has shifted elsewhere I have not yet found it. 'C' 10872 kHz has been unreliable recently, tonight's keying is a complete mess. It is interesting to compare the failure modes of 'D' and 'C'. When Sevastopol fails the keying remains a regular, repeated sequence and all channels are keyed simultaneously - the inferencing being that all transmitters use a single common keying unit. When 'C' has been observed to fail it has only affected the 10872 kHz outlet and there is no discernible pattern to the keying errors.

The evening traffic broadcast from Sevastopol is well under way by the time propagation permits its reception here in the UK around 15:00 Z. Broadcasts routinely continue past 19:30 Z, all seemingly hand sent. The need to change operators might explain the occasional lengthy pause between messages.

14/4/23 10/4/23 \*4031 kHz V. \*4183/4184 kHz T/Osnova-98. \* 5153 kHz cluster: D,P,S,C,A. \* 5156.8 kHz L. \* 7039.4 kHz: M. \* 7508 kHz Cluster: P,S,A. \*8495 kHz cluster: S,C. \*8497.8 kHz: L. \* 10871 kHz Cluster: D,S,C,A. Irregular faulty keying on 'C' and raspy note. \* 13527 cluster: D,S,A,F,K,M (K= 2 repeats and a pause). \*16332 Cluster: S,K.

Lengthy hand sent traffic broadcast from RCV/Sevastopol on 3797 kHz from C. 18:30 Z to 20:12Z.

15/4/23 10/4/23 \*4031 kHz V. \*4183/4184 kHz T/Osnova-98 absent. \* 5153 kHz cluster: D,P,S,A. \* 5156.8 kHz L. \* 7039.4 kHz: M. \* 7508 kHz Cluster: P,S,A. \*8495 kHz cluster: D,S,C,A. \*8497.8 kHz: L. \* 10871 kHz Cluster: D,S,C,A. Poor note on C but keying much improved - occasional extra dashes. \* 13527 cluster: D,S,A,M. \*16332 Cluster: A,K.

Traffic broadcast from RCV/Sevastopol on 3797 kHz from C. 18:00Z to c. 19:30Z.

16/4/23 10/4/23 \*4031 kHz V. \*4183/4184 kHz T/Osnova-98 absent. \* 5153 kHz cluster: D,P,S,A. \* 5156.8 kHz L. \* 7039.4 kHz: M. \* 7508 kHz Cluster: P,S,A. \*8495 kHz cluster: D,S,C,A. \*8497.8 kHz: L. \* 10871 kHz Cluster: D,S,C,A. \* 13527 cluster: D,S,A. \*16332 Cluster: D,S,A.

Traffic broadcast from RCV/Sevastopol on 3797 kHz from C. 17:30Z to 19:42Z.

17/4/23 10/4/23 \*4031 kHz V. \*4183/4184 kHz T/Osnova-98 returns. \* 5153 kHz cluster: D,S. \* 5156.8 kHz L absent. \* 7039.4 kHz: M. \* 7508 kHz Cluster: P,S,A. \*8495 kHz cluster: D,S,C,A. \*8497.8 kHz: L. \* 10871 kHz Cluster: D,S,C,A. \* 13527 cluster: D,S,A,M. \*16332 Cluster: S,C,A,K (K sent continually rather than in the usual groups of four - new keyer?).

18/4/23 10/4/23 \*4031 kHz V. \*4183/4184 kHz T/Osnova-98 absent. \* 5153 kHz cluster: D,P,A. \* 5156.8 kHz L absent. \* 7039.4 kHz: M. \* 7508 kHz Cluster: P,S,A. \*8495 kHz cluster: D,S,C,A. \*8497.8 kHz: L. \* 10871 kHz Cluster: D,S,C,A. \* 13527 cluster: D. \*16332 Cluster: D,S,A.

19/4/23 10/4/23 \*4031 kHz V. \*4183/4184 kHz T/Osnova-98 absent. \* 5153 kHz cluster: D,P,S,A. \* 5156.8 kHz L absent. \* 7039.4 kHz: M. \* 7508 kHz Cluster: P,S,A. \*8495 kHz cluster: C. \*8497.8 kHz: L. \* 10871 kHz Cluster: D,S,C,A,K. \* 13527 cluster: D,S. \*16332 Cluster: No sigs.

20/4/23 10/4/23 \*4031 kHz V. \*4183/4184 kHz T/Osnova-98 absent. \* 5153 kHz cluster: D,P,S,A. \* 5156.8 kHz L absent. \* 7039.4 kHz: M. \* 7508 kHz Cluster: P,S,A. \*8495 kHz cluster: D,S,C. \*8497.8 kHz: L. \* 10871 kHz Cluster: D,S,C,A. \* 13527 cluster: D,S,A,M. \*16332 Cluster: S,A.

21/04/23 No observations

22/4/23 10/4/23 \*4031 kHz V. \*4183/4184 kHz T/Osnova-98 absent. \* 5153 kHz cluster: D,P,M. \* 5156.8 kHz L absent. \* 7039.4 kHz: M. \* 7508 kHz Cluster: P,S,A. \*8495 kHz cluster: C. \*8497.8 kHz: L. \* 10871 kHz Cluster: D,S,C,A. 'C' has random nonsensical keying. \* 13527 cluster: D,S,A. \*16332 Cluster: D,S,C,M. 'C' keying normally.

-----  
Of note are the continued problems Moscow has with the 10872 kHz transmission of 'C' - after a few days of regular keying the transmitter reverted back to its previous faulty status. Interestingly it was absent tonight (Sun 30 April) - I can only assume that it is off the air for maintenance.

23/4/23 \*4031 kHz V. \*4183/4184 kHz T/Osnova-98 absent. \* 5153 kHz cluster: D,P,A. \* 5156.8 kHz L absent. \* 7039.4 kHz: M. \* 7508 kHz Cluster: P. \*8495 kHz cluster: No sigs. \*8497.8 kHz: L absent. \* 10871 kHz Cluster: D,C,A. #### From PoSW:

**First + Third Thursdays in the Month Schedule, 0600 + 0700 UTC in March, 0500 + 0600 in April:-**

2-Mar-23:- 0600 UTC, 16230 kHz, calling “864”, DK/GC “109 109 52 52”. Good signal, ended around 0613z.  
0700 UTC, 19325 kHz, second sending, strong signal.  
Frequencies as per prediction list in En129 of March last year.

2-Mar-23, Friday:- The repeat on the following day:-

0600 UTC, 16230 kHz, much weaker signal than 24 hours earlier.

0700 UTC, 19325 kHz, weak at first, difficult copy, started to become stronger around 0709z and was much stronger by 0711.

16-Mar-23:- Missed it, clean forgot that this was the third Thursday in the month!

17-Mar-23, Friday:- 0600 UTC, 16230 kHz, "864", DK/GC "132 132 50 50", fair signal.

0700 UTC, 19325 kHz, strong signal.

6-Apr-23:- 0511 UTC, 15645 kHz, nothing audible on the predicted frequency until about eleven minutes in; rapidly became stronger, ended with, "320 320 68 68 00000" before 0516z. Higher group count than usual for this schedule. Has moved by one hour UTC in this month but because of the start of BST still shows up at 6 and 7 am.

0600 UTC, 17480 kHz - not heard for the first few minutes because the RX had been tuned in to the expected frequency of 17470; a quick tweak of the tuning found it "ten up". Strong signal, became very strong.

7-Apr-23, Friday:- 0500 UTC, 15645 kHz, very weak at first and again started to become stronger around 0511z.

0600 UTC, 17470 kHz, strong signal. Call "951", pre-transmission warm-up noted around 0551, carrier + tone followed by a single spoken "951".

20-Apr-23:- 0500 UTC, 15645 kHz, call "951", DK/GC "723 723 60 60", good signal but unusually became weaker as the transmission progressed.

0600 UTC, 17475 kHz, strong.

21-Apr-23, Friday:- 0500 UTC, 15645 kHz, first sending of the repeat of yesterday's.

0600 UTC, 17470 kHz, strong signal.

Tnx RNGB and PoSW

## E07

PoSW starts the ball rolling

### **Saturday Schedule, 1400 UTC Start in March, 1300 UTC in April:-**

4-Mar-23:- 1420 UTC, 11143 kHz, "114 114 114 000", good signal, missed 1400z sending which would have been on 12143.

11-Mar-23:- 1400 UTC, 12143 kHz, "114 114 114 000", strong.

1420 UTC, 11143 kHz, weaker but still audible above local noise interference.

25-Mar-23:- 1400 UTC, 12143 kHz, strong and 1420 UTC, 11143 kHz, weaker, "114 114 114 000".

1-Apr-23:- 1300 UTC, 12176 kHz, has - for someone's convenience, perhaps - moved by one hour UTC but because in the UK the clocks have moved by one hour with the start of British Summer Time still appears at 2 pm. "152 152 152 000", strong signal.

1320 UTC, 11576 kHz, also strong.

8-Apr-23:- 1300 UTC, 12176 kHz, strong and 1320 UTC, 11576 kHz, weaker, "152 152 152 000".

15-Apr-23:- 1300 UTC, 12176 kHz, "152 152 152 000", strong.

1320 UTC, 11576 kHz, weaker.

22-Apr-23:- 1300 UTC, 12176 kHz, strong signal and 1320 UTC, weaker, "152 152 152 000".

### **Sunday Schedule, 0700 UTC Start in March, 0600 UTC in April:-**

12-Mar-23:- 0700 UTC, 10268 kHz, "201 201 201 000", weak signal.

0720 UTC, 11068 kHz, stronger.

19-Mar-23:- 0700 UTC, 10268 kHz, "201 201 201 000", strong enough to be heard above local interference.

0720 UTC, 11068 kHz, weaker.

26-Mar-23:- 0700 UTC, 10268 kHz, "201 201 201 000".

0720 UTC, 11068 kHz, strong.

2-Apr-23:- 0600 UTC, 9261 kHz, "224 224 224 000", good signal.

0620 UTC, 10261 kHz, weaker.

9-Apr-23:- 0600 UTC, 9261 kHz and 0620 UTC, 10261 kHz, "224 224 224 000".

16-Apr-23:- 0600 UTC, 9261 kHz and 0620 UTC, 10261 kHz, both strong, "224 224 224 000".

23-Apr-23:- 0600 UTC, 9261 kHz, "224 224 224 000", strong.

0620 UTC, 10261 kHz, weaker.

### **Saturday + Thursday Schedule, 1410 UTC Start:-**

Unlike the above two schedules this one stays on UTC and so appears one hour later in the month of April with the start of British Summer Time.

4-Mar-23, Saturday:- 1410 UTC, 16284 kHz, "328 328 328 1", DK/GC "6085 79" x 2, strong signal.

1430 UTC, 14854 kHz, also strong.

1450 UTC, 13384 kHz, weaker.

9-Mar-23, Thursday:- 1410 UTC, 16284 kHz, "328 328 328 000", strong signal.

1430 UTC, 14854 kHz, weaker.

11-Mar-23, Saturday:- 1410 UTC, 16284 kHz, strong and 1430 UTC, 14854 kHz, weaker, “328 328 328 000”.

16-Mar-23, Thursday:- 1432 UTC, 14854 kHz, message in progress, missed 1410z sending, ended around 1437:40s UTC.  
1450 UTC, 13384 kHz, “328 328 328 1”, DK/GC “3868 61” x 2, good signal.

25-Mar-23, Saturday:- 1410 UTC, 16284 kHz, “328 328 328 000”.  
1430 UTC, 14854 kHz, weaker.

1-Apr-23, Saturday:- 1410 UTC, 16331 kHz, “893 893 893 000”, good signal.

1430 UTC, 15831 kHz, weaker.

Starts one hour later now that the clocks have changed for British Summer Time.

6-Apr-23, Thursday:- 1410 UTC, 16331 kHz, “893 893 893 000”, strong signal. SLT cluster on close frequency, “S” the strongest by far.  
1430 UTC, 15831 kHz, also strong.

8-Apr-23, Saturday:- 1410 UTC, 16331 kHz, good signal with SLT “S” for company and 1430 UTC, 15831 kHz, good signal, “893 893 893 000”.

13-Apr-23, Thursday:- 1410 UTC, 16331 kHz, “893 893 893 1”, DK/GC “559 64” x 2, strong signal with SLT as before.  
1430 UTC, 15831 kHz, also strong.  
1450 UTC, 14831 kHz, weaker.

15-Apr-23, Saturday:- 1410 UTC, 16331 kHz, “893” and “559 64” again, weaker than usual,  
S5 to S6, SLT “S” strong as always.  
1430 UTC, 15831 kHz, stronger, missed the third sending.

20-Apr-23, Thursday:- 1410 UTC, 16331 kHz, “893 893 893 000”, good signal with strong SLT “S”.  
1430 UTC, 15831 kHz, also strong.

22-Apr-23, Saturday:- 1410 UTC, 16331 kHz, “893 893 893 000”, weaker than usual, SLT “S” strong enough.  
1430 UTC, 15831 kHz, also weaker than usual.

#### **Tuesday + Friday Schedule, 1500 UTC Start:-**

10-Mar-23, Friday:- 1541 UTC, 17451 kHz, must be the third sending, not in the prediction list so a search required. “584 584 584 1”, DK/GC “9071 64” x 2. Good signal, nothing had been found at 1500 and 1520 UTC.

21-Mar-23, Tuesday:- 1527 UTC, 15851 kHz, message in progress, must have started at 1520z, ended after 1532.  
1540 UTC, 17451 kHz, “584 584 584 1”, DK/GC “7584 118” x 2, strong signal.

24-Mar-23, Friday:- Unable to find the first sending at 1500z, thought that 14551 or 13551 might be likely candidates but nothing heard.  
1520 UTC, 15851 kHz, very weak, unreadable.  
1540 UTC, 17451 kHz, also very weak in contrast with previous occasions.

28-Mar-23, Tuesday:- 1520 UTC, 15851 kHz, back to being a strong signal, “584 584 584 000”.

31-Mar-23, Friday:- 1520 UTC, 15851 kHz, strong, “584 584 584 000”.  
Never did find the 1500z sending.

Always a bit of a problem to find this schedule in the new month:-

7-Apr-23, Friday:- 1506 UTC, 16257 kHz, message transmission in progress, ended after 1514z. Has stayed on UTC so showing up one hour later than the past few months now that the clocks have moved forward for summertime. It used to be the case that in general E07 schedules would move by an hour when the clocks changed so as to appear at the same local time.  
1524 UTC, 18257 kHz, in progress, must be the second sending.  
1545 UTC, 19157 kHz, strong signal, in progress.

14-Apr-23, Friday:- 1500 UTC, 16257 kHz, “221 221 221 000”, good signal.  
1520 UTC, 18257 kHz, weaker.

From PoSW we have:

A small selection of transmissions heard from this busy number station although, as usual, mostly of the “no message” format lasting just over three minutes. Stays on UTC so with the start of summertime we have to get used to tuning in one hour later local time.

#### 4181 kHz

4-Mar-23, Saturday, 1910 UTC, “394/00”, strong.  
 25-Mar-23, Saturday:- 1910 UTC, “394/39”, message, very strong, “Out” at 1921z.  
 29-Mar-23, Wednesday:- 1910 UTC, “399/00”, very strong signal.  
 15-Apr-23, Saturday:- 1910 UTC, “399/33”, message, “Out” just before 1920z.  
 22-Apr-23, Saturday:- 1910 UTC, “390/00”.

#### 7317 kHz

9-Mar-23, Thursday:- 1900 UTC, “646/35”, message.  
 27-Mar-23, Monday:- 1900 UTC, “648/00”.  
 30-Mar-23, Thursday:- 1900 UTC, “644/00”.  
 10-Apr-23, Monday:- 1900 UTC, “648/00”, strong signal.  
 27-Apr-23, Thursday:- 1900 UTC, “641/00”.

#### 8180 kHz:-

31-Mar-23, Friday:- 0700 UTC, “571/35”, message, “Out” after 0710z.  
 28-Apr-23, Friday:- 0700 UTC, “571/00”.

#### 8530 kHz:-

3-Mar-23, Friday:- 1910 UTC, “616/36”, message, good signal.  
 14-Apr-23, Friday:- 1910 UTC, “610/32”, message.  
 21-Apr-23, Friday:- 1910 UTC, “613/00”.

#### 14865 kHz

14-Mar-23, Tuesday:- 0745 UTC, “224/00”.  
 16-Mar-23, Thursday:- 0745 UTC, “221/00”.  
 21-Mar-23, Tuesday:- 0745 UTC, “229/00”.  
 28-Mar-23, Tuesday:- 0745 UTC, “221/00”.  
 25-Apr-23, Tuesday:- 0745 UTC, “225/00”, weak signal.

#### 14972 kHz

1-Apr-23, Saturday:- 1430 UTC, “915/00”.  
 8-Apr-23, Saturday:- 1430 UTC, “914/32”, message.  
 15-Apr-23, Saturday:- 1430 UTC, “911/00”.  
 22-Apr-23, Saturday:- 1430 UTC, “911/00”.

#### 15905 kHz

10-Mar-23, Friday:- 0830 UTC, “188/00”, strong.  
 13-Mar-23, Monday:- 0830 UTC, “184/00”.  
 Became a much weaker signal as the hours of daylight have increased.

#### 17410 kHz

8-Mar-23, Wednesday:- 0745 UTC, “349/00”, good signal.  
 17-Mar-23, Friday:- 0745 UTC, “346/38”, message, “Out” at 0755:50s UTC approx.  
 21-Apr-23, Friday:- 0745 UTC, “340/00”.

PoSW writes:

First + Third Fridays in the Month Schedule:-  
3-Mar-23:- 2100 UTC, 6985 kHz, "637 637 637 00000", strong signal. Must be the second sending, unable to find a transmission on a higher frequency at 2000z. Frequencies in March of last year were 9268 + 6775.

17-Mar-23:- 2100 UTC, 6985 kHz, "637 637 637 00000", strong, still nothing found at 2000 UTC.

Moved by one hour UTC in April but still appears at 8 and 9 pm in the UK because of the clocks "spring forward" for BST.  
7-Apr-23:- 1902 UTC, 9412 kHz, the elusive first sending found in progress, weak signal, "637 637 637 00000".  
2000 UTC, 6985 kHz, much stronger.

21-Apr-23:- 1900 UTC, 9412 kHz, "637 637 637 00000", weak signal, weak FSK on same or very close frequency.  
2000 UTC, 6985 kHz, much stronger.

# Gizza Job

SECURITY SERVICE  
MI5

# GROW YOUR COMMERCIAL CAREER AT MI5.

DISCOVER A VARIETY OF COMMERCIAL ROLES IN CENTRAL LONDON, CHELTENHAM AND BUCKINGHAMSHIRE

FIND OUT MORE AT MI5

This advertisement for MI5 features a blue background with digital interface elements like binary code and arrows. The MI5 logo is in the top right corner. The main text 'GROW YOUR COMMERCIAL CAREER AT MI5.' is in large white letters, with 'COMMERCIAL' in light blue. Below it, 'DISCOVER A VARIETY OF COMMERCIAL ROLES IN CENTRAL LONDON, CHELTENHAM AND BUCKINGHAMSHIRE' is in white and light blue text. At the bottom right is the MI5 logo with the text 'FIND OUT MORE AT MI5'.

# NSA ON CAMPUS!

March 7                            March 8

**UNG**  
University of North Georgia

**RIT** | Rochester Institute of Technology

March 9

**COLORADO STATE UNIVERSITY**

[IntelligenceCareers.gov/NSA](http://IntelligenceCareers.gov/NSA)

NATIONAL SECURITY AGENCY  
UNITED STATES OF AMERICA

This advertisement for NSA On Campus events features a dark blue background with a grid pattern. It lists three events: UNG on March 7, RIT on March 8, and Colorado State University on March 9. Each event is shown in a white box with its name in large letters and the university's logo. At the bottom, there is a link to IntelligenceCareers.gov/NSA and the NSA seal.
